FOREWORD

As part of its foundational mandate, SESRIC has been dedicated to ensuring the availability of comprehensive statistical data and information pertinent to OIC member countries. This rigorous effort aims at better understanding the potential, needs and capacities of each member, thereby promoting cooperative projects and integration initiatives. By providing data in line with SMART (specific, measurable, assignable, realistic, and time-related) criteria, SESRIC enables decision-makers to formulate more effective and evidence-based policies, thereby contributing to socio-economic development and cooperation among OIC countries.

The Centre's primary statistical database, the **OIC Statistics Database (OICStat)**, stands as the premier resource for comprehensive statistical information on all 57 OIC countries. Available in Arabic, English, and French, OICStat offers a rich array of data with over 1,800 indicators across 27 categories, dating back to 1970. The database, designed for ease of use, is freely accessible through the SESRIC website and directly at: *http://www.sesric.org/oicstat.php*.

Recognized as an invaluable tool for decision-makers, researchers, and analysts, OICStat's continuous enhancement is critical. By expanding its content, SESRIC aims to support the collective efforts to elevate cooperation among OIC countries in diverse socio-economic domains.

The 2023 edition of the flagship report, the "**Statistical Yearbook on OIC Member Countries**", presents 251 selected socio-economic statistical indicators under 22 categories, generally spanning from 2000 to 2022. This report provides both individual country data and aggregated group data of the OIC, with performance metrics compared to global averages.

This year, the data vividly reflect the recovery from the COVID-19 pandemic. Significant improvements are evident in areas such as international trade, real GDP, labour force participation, unemployment rate, and immunization coverage among 1-year-olds. In the OIC in 2022, the trade-to-GDP ratio surged by 8.4%, real GDP grew by 5.5%, labour force participation increased by 0.5%, unemployment fell by 0.7%, and immunization coverage among 1-year-olds improved by at least 1%. Conversely, the data also indicate a trend of rising consumer prices worldwide. These indicators collectively illustrate the strides made towards recovery, as well as the ongoing challenges in the post-pandemic era.

The Statistical Yearbook by SESRIC stands as a flagship publication, reflecting the Centre's longstanding commitment to data dissemination and analysis. As

users increasingly access OICStat, SESRIC's annual statistical publication remains pivotal in documenting crucial economic and social indicators across OIC countries. It continues to serve as a vital resource, offering valuable information that fosters development and cooperation among member countries.

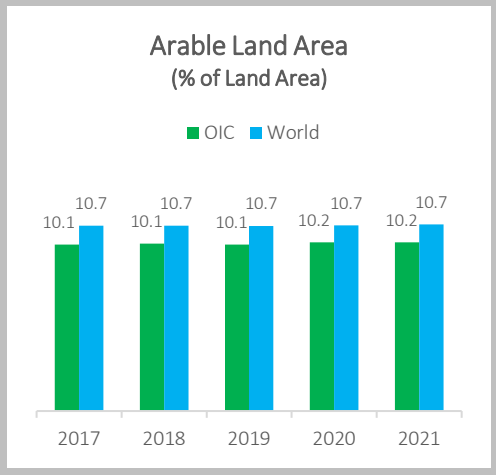

I extend my thanks to the team at the Statistics and Information Department of SESRIC for their diligent work in producing this comprehensive publication. It is our hope that this statistical yearbook continues to serve as a valuable resource for all those interested in OIC countries and the broader Islamic world.

BANKING, MONEY AND PRICES

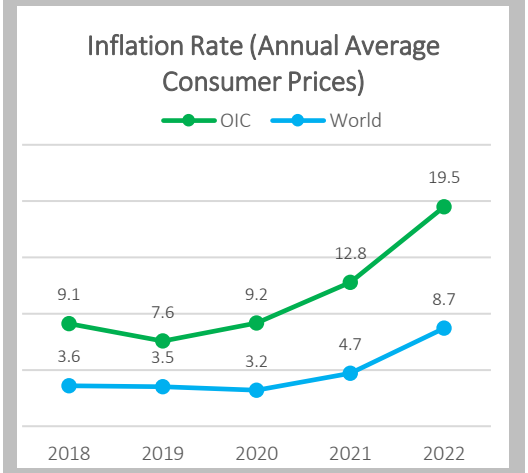

2. BANKING, MONEY AND PRICES

Capacity of domestic financial institutions in the OIC in 2021 remained below the world average

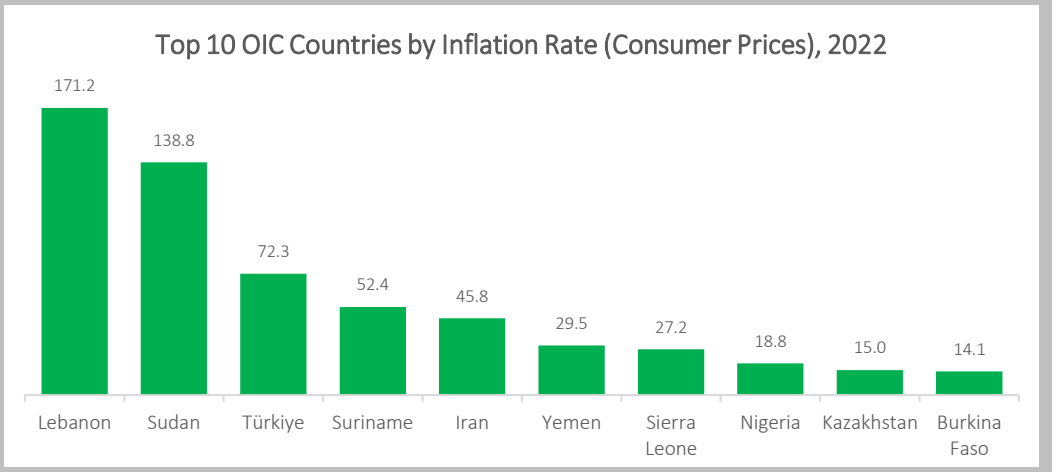

See Tables 2.1-2.2

The disparity in price increases between the OIC and the rest of the world is widening

See Table 2.7

Inflation rates in the top five OIC countries are notably high, placing them among the top 10 worldwide in 2022

See Table 2.7

DISASTERS AND EMERGENCY EVENTS

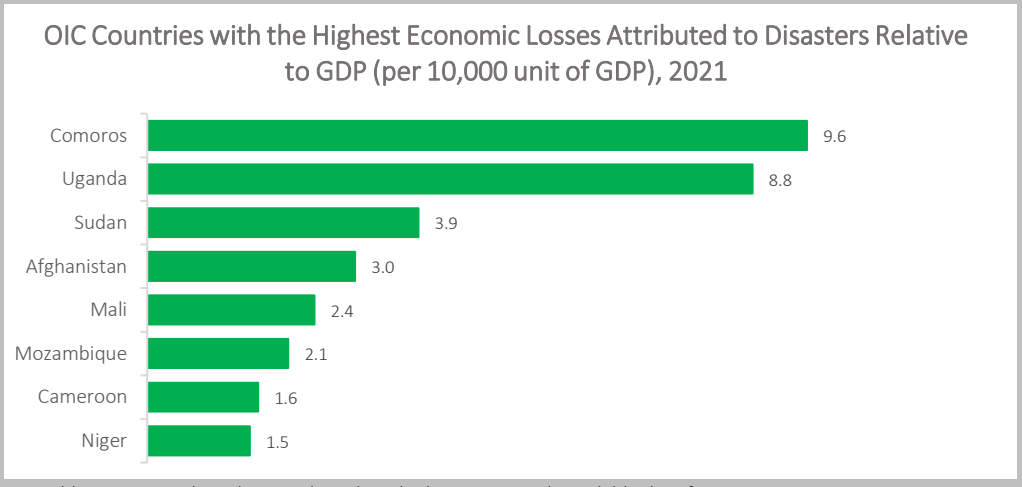

4 DISASTERS AND EMERGENCY EVENTS

More than 90% of deaths and missing persons due to disasters occurred in low and middle-income OIC countries

See Table 4.3. Note: The values are based on the latest year with available data from 2017 to 2021.

Economic losses resulting from disasters were also much higher in poorer OIC countries

See Table 4.6. Note: The values are based on the latest year with available data from 2017 to 2021.

ENERGY

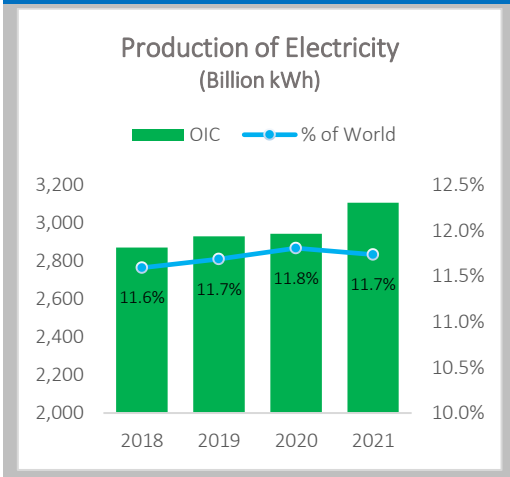

6. ENERGY

Access to electricity has been steadily increasing in both the OIC and the world

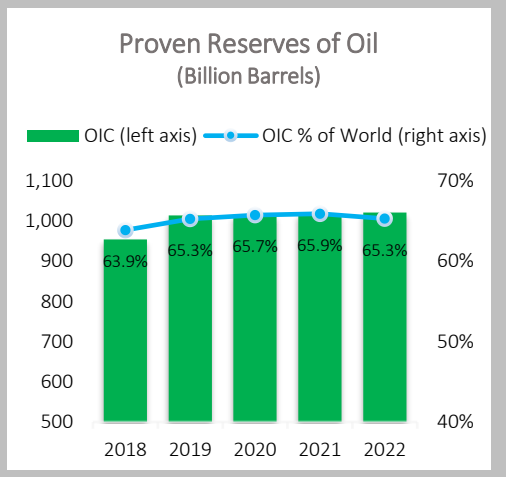

See Table 6.1

Electricity generation in the OIC is increasing in line with access to electricity

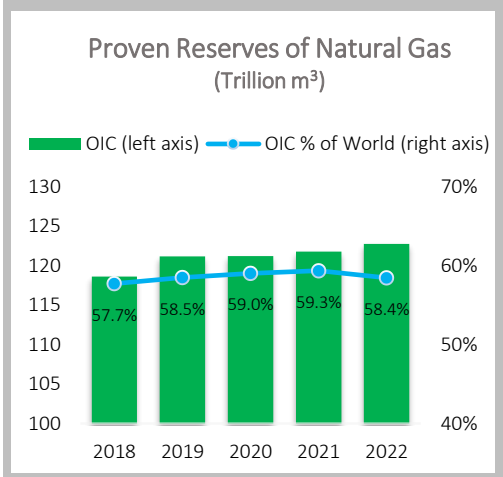

See Table 6.7

OIC countries own almost two-thirds of the global proven oil reserves

See Table 6.10

OIC countries also own more than half of the global proven natural gas reserves

See Table 6.12

Table 6.15: Definitions of Energy Indicators

INDICATOR	DEFINITION
Proportion of Population with Access to Electricity (%)	Proportion of population with access to electricity is the percentage of population with access to electricity.
Proportion of Population with Access to Electricity, Rural (%)	Refers to the percentage of rural population with access to electricity.
Proportion of Population with Access to Electricity, Urban (%)	Refers to the percentage of urban population with access to electricity.
Adjusted Savings, Energy Depletion (USD)	Ratio of the value of the stock of energy resources (coal, crude oil, and natural gas) to the remaining reserve lifetime (capped at 25 years), expressed in terms of USD in current prices.
Adjusted Savings, Energy Depletion, % of GNI	Level of energy depletion adjusted savings in GNI, expressed in terms of percentage.
Energy Production (Tonnes of Oil Equivalent)	Refers to forms of primary energy - petroleum (crude oil, natural gas liquids, and oil from nonconventional sources), natural gas, solid fuels (coal, lignite, and other derived fuels), and combustible renewables and waste, and primary electricity, all converted into tonnes of oil equivalent.
Production of Electricity (kWh)	Output of electricity plants that are designed to produce electricity only as well as that of combined heat and power plants, expressed in terms of kilowatt-hours.
Electricity Capacity, Renewable, Total (Megawatts)	Capacity is the amount of electricity a generator can produce when it's running at full blast. This maximum amount of power is typically measured in megawatts and helps utilities project just how big of an electricity load a generator can handle. Sum of renewable energy capacities of hydropower, marine, wind, solar, and bioenergy.
Electricity Generation, Renewable, Total (GWh)	Electricity generation is the process of generating electric power. Sum of renewable energy capacities of hydropower, marine, wind, solar, and bioenergy.
Proven Reserves, Oil (Barrels)	Estimated quantities of all liquids statistically defined as crude oil, expressed in terms of barrels. They consist of those quantities of crude oil which by analysis of geoscience and engineering data can be estimated with reasonable certainty to be commercially recoverable, from a given date forward, from known reservoirs and under defined economic conditions, operating methods and government regulations.
Production of Crude Oil (Barrels per Day)	Crude oil is a mineral oil consisting of a mixture of hydrocarbons of natural origin, being yellow to black in colour, of variable density and viscosity. It also includes lease condensate (separator liquids) which are recovered from gaseous hydrocarbons in lease separation facilities. Expressed in terms of barrels per day.
Proven Reserves, Natural Gas (m^3)	Estimated quantities of all hydrocarbons statistically defined as natural gas, expressed in terms of cubic meter. They consist of those quantities of natural gas (associated and non-associated) which by analysis of geoscience and engineering data can be estimated with reasonable certainty to be commercially recoverable, from a given date forward, from known reservoirs and under defined economic conditions, operation methods and government regulations.
Production of Natural Gas, World Marketed (m^3)	Gross production of natural gas less the volumes of gas flared or re-injected into fields less the shrinkage, expressed in terms of cubic meter.
Total Final Energy Consumption (Tonnes of Oil Equivalent)	Amount of energy available for final use in homes, businesses (including for non-energy uses), and for transport, expressed in terms of tonnes of oil equivalent.

ENVIRONMENT

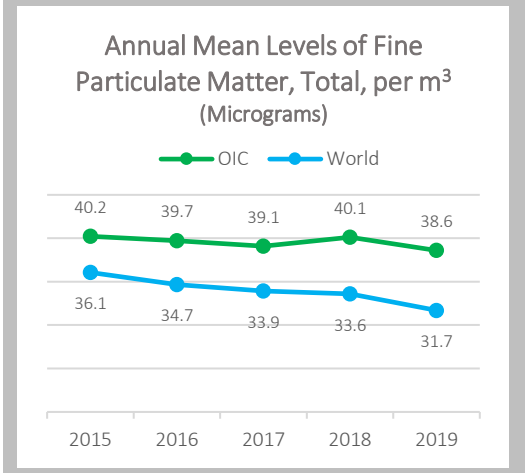

7. ENVIRONMENT

OIC countries' CO_2 emissions continued to rise in 2022

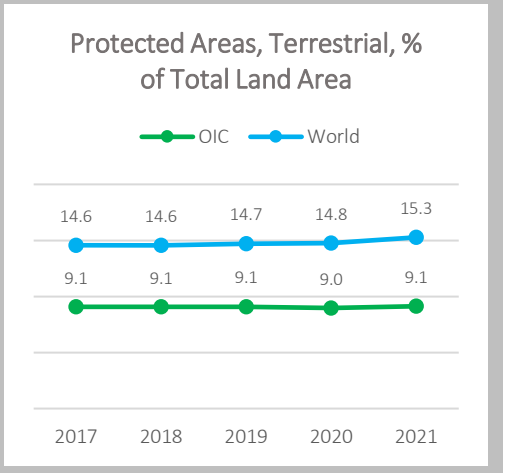

See Table 7.1

Reductions in air pollution were moderate in the OIC in 2019

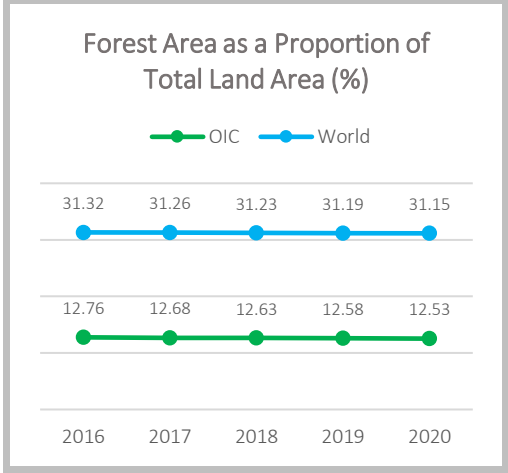

See Table 7.3

Share of protected areas in total land area in the OIC has remained below world averages

See Table 7.4

Share of forest area in total land area is decreasing slightly in the OIC and the world

See Table 7.5

Table 7.6: Definitions of Environment Indicators

INDICATOR	DEFINITION
CO_2 Emissions, Territorial, Total (Tonnes)	Carbon dioxide emissions from the oxidation / venting / manufacture of cement, coal, oil, gas, gas flaring, and others attributed to the country in which they physically occur.
CO_2 Emissions, Consumption (Tonnes)	Carbon dioxide emissions occurring anywhere in the world attributed to the country in which goods and services are consumed, expressed in terms of tonnes.
Annual Mean Levels of Fine Particulate Matter, Total, per m^3 (Micrograms)	Average level of exposure of a country's population to concentrations of suspended particles measuring less than 2.5 microns in diameter, expressed in terms of micrograms per cubic meter.

See Tables 8.1-8.2. Note: OIC averages for 2022 are based on latest year available data from 2018 to 2022. For the world pre-primary average, 2022 refers to 2020.

OIC countries as a group achieved gender parity in tertiary enrolment in 2022

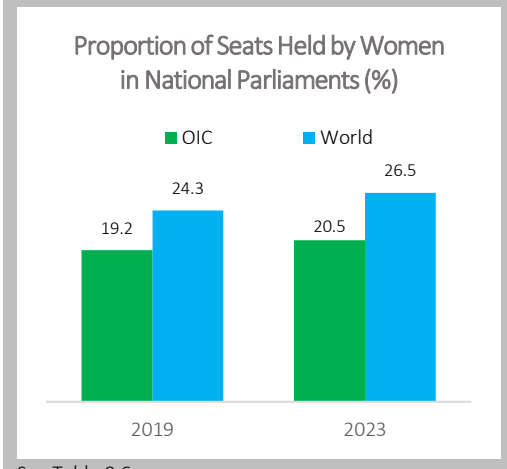

See Tables 8.3-8.4. Note: OIC averages for 2022 are based on latest year available data from 2018 to 2022.

Gender gaps in labour force participation remain persistent in the OIC and the world

See Table 8.5.

INDUSTRY AND MANUFACTURING

Share of employment in industry sector of the OIC has been below the global average

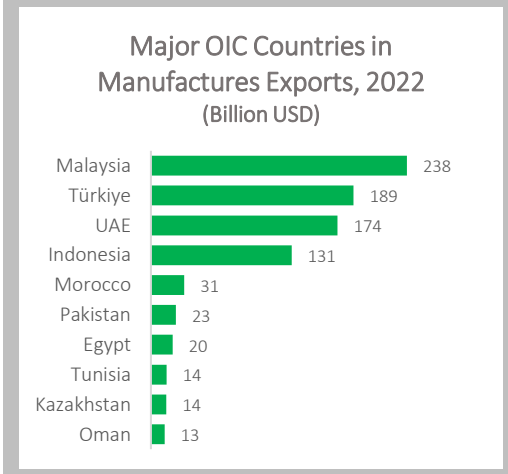

See Table 10.1

OIC's manufacturing trade deficit is persistent

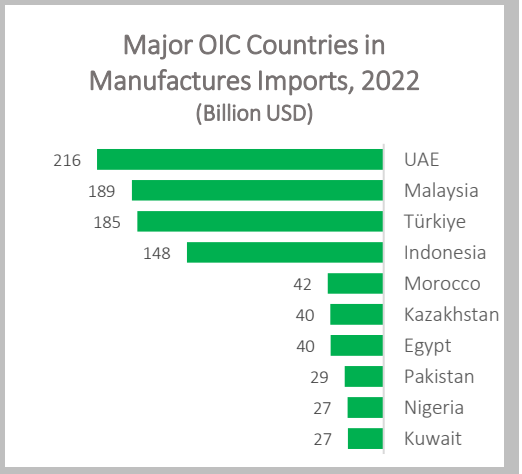

See Table 10.6. Note: OIC averages are calculated based on latest year available data from 2019 to 2022.

Manufactures exports and imports of OIC countries were concentrated in a few countries in 2022

See Table 10.2.

See Table 10.4.

Table 13.11: Definitions of Islamic Banking and Finance Indicators

INDICATOR	DEFINITION
Islamic Banking, Islamic Banks	Number of banking and near-banking institutions offering Islamic financial services.
Islamic Banking Windows, Conventional Banks	Number of conventional banks with branches or dedicated units that provide Shari'ah-compliant banking services.
Islamic Banking, Total Assets (USD)	Aggregate total assets of banking and near-banking institutions offering Islamic financial services consisting of all financial and non-financial assets, by domestic and foreign control.
Islamic Banking Windows, Total Assets (USD)	Total assets of Islamic banking branches and Islamic windows of conventional banks.
Islamic Banking, Total Assets, Total Shariah-Compliant Financing (excluding Interbank Financing) (USD)	Value of outstanding Shari'ah-compliant financing of banking and near-banking institutions offering Islamic financial services.
Islamic Banking Windows, Total Assets, Total Shariah-Compliant Financing (excluding Interbank Financing) (USD)	Value of outstanding Shari'ah-compliant financing of Islamic windows of conventional banks.
Islamic Banking, Total Funding/Liabilities and Equity (USD)	Total funding/liabilities of banking and near banking institutions offering Islamic financial services, by domestic and foreign control. Categories include: Profit-sharing investment accounts, Other remunerative funding (Murabahah, Commodity Murabahah etc.), Nonremunerative funding (current account, Wadia), Sukuk issued, Other Shari'ah-compliant securities issued, Interbank funding/liabilities, and all other liabilities.
Islamic Banking Windows, Total Funding/Liabilities and Equity (USD)	Total funding/liabilities of Islamic windows of conventional banks.
Islamic Banking, Total Funding/Liabilities and Equity, Capital and Reserves (USD)	Owners' or shareholders' equity, which may include paid-up ordinary share capital, reserves, preference share capital, current surplus/(loss) from sale of fixed and long-term investments and profit equalisation reserve from distributable income set aside for shareholders, as well as any other funds contributed by owners. Also represents the difference between total assets and total liabilities.
Islamic Banking Windows, Total Funding/Liabilities and Equity, Capital and Reserves (USD)	Capital of Islamic Banking Windows units can be estimated in two ways: (a) The calculation uses the proxy that proportionates the capital structure of the bank as a whole. This assumes that the unit and the parent company have the same quality of financial exposure. (b) The authority requires the parent company to have a detailed policy for allocating funds and to allow the unit to manage the funds more independently. Apart from the differences, the unit can still apply the same treatments on current surplus/(loss) from sale of fixed and long-term investments and profit equalisation reserve from distributable income set aside for shareholders, as well as any other funds contributed by owners.

SOCIAL DEVELOPMENT

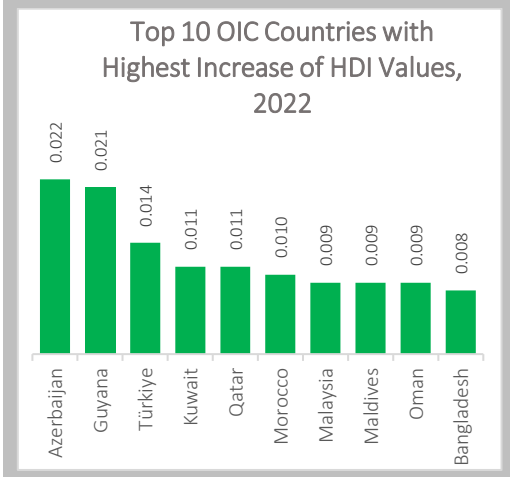

17. SOCIAL DEVELOPMENT

In 2022, both the OIC and the world barely reached pre-pandemic Human Development Index values

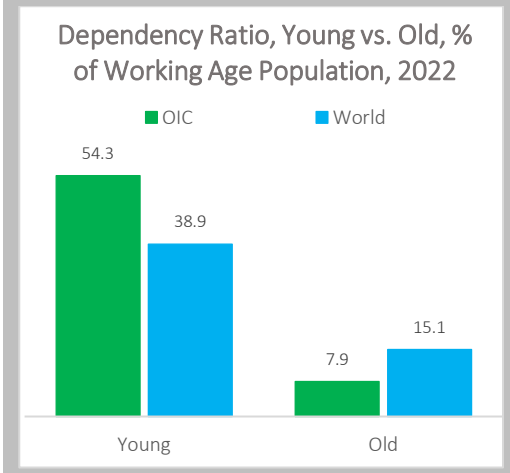

See Table 17.1

Human development index values increased in nearly all OIC countries in 2022

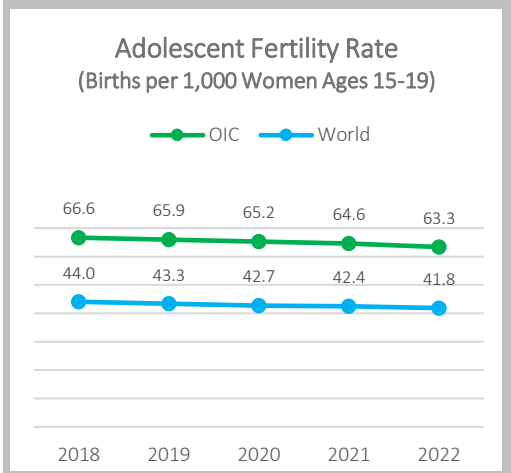

See Table 17.1

Contrary to the world, the OIC has a higher young and lower old dependency on working population

See Tables 17.2-17.3

Births per young woman aged 15-19 years are declining both in the OIC and globally

See Table 17.6

See Tables 18.1-18.3

Unmanufactured tobacco production in the OIC is about 14% of global production

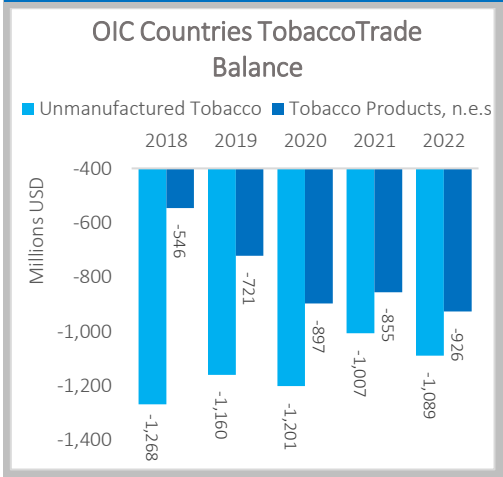

See Table 18.4

Despite the increase, average yield of unmanufactured tobacco in the OIC is below the world average

See Table 18.5

OIC countries as a group are large net importers of tobacco products

See Tables 18.7-18.10

TOURISM

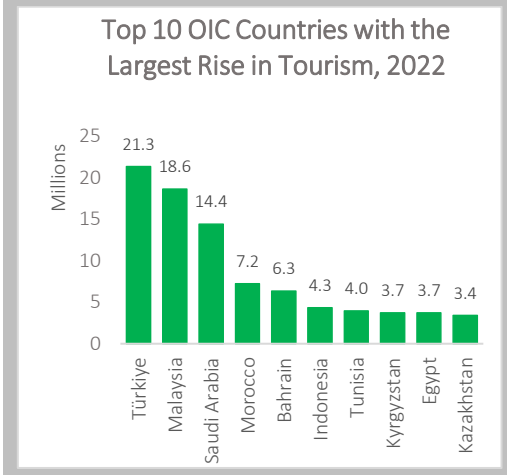

19. TOURISM

Number of air passengers carried in the OIC experienced a limited recovery in 2021

See Table 19.1

Number of international tourist arrivals increased almost in all OIC countries in 2022

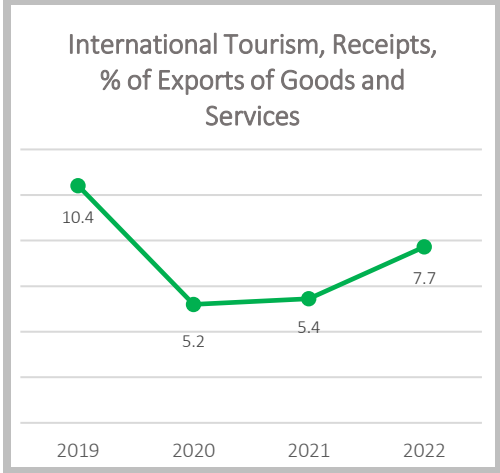

See Table 19.3

OIC countries' tourism revenues and expenditures are gradually recovering

See Tables 19.5 and 19.7

Tourism's share of export revenues in the OIC also recovered in 2022

See Table 19.9

WATER

Pressure on freshwater resources in the OIC is considerably higher than the world average

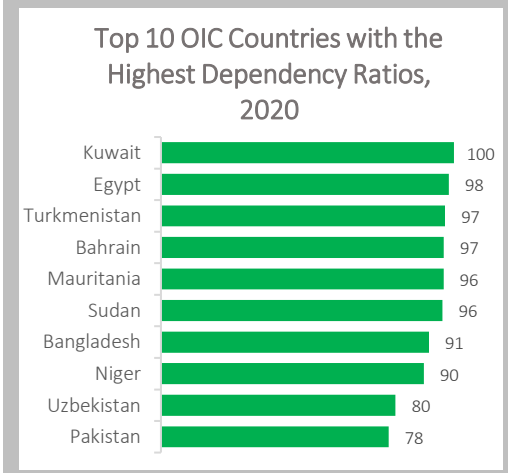

See Table 21.8

Water stress levels are severe in some OIC countries

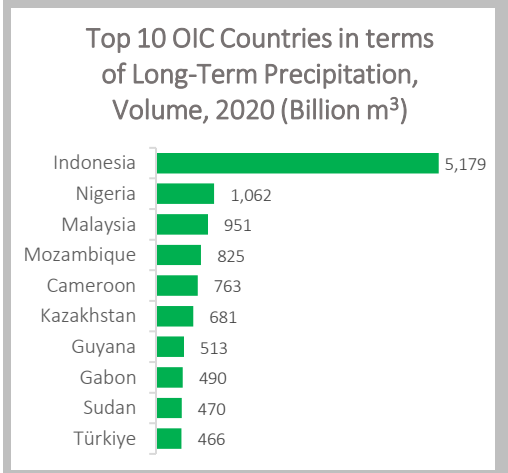

See Table 21.8

Many OIC countries are significantly dependent on the inflow of external water resources

See Table 21.7

A large gap exists among OIC countries in long-term precipitation averages

See Table 21.11

Table 21.12: Definitions of Water Indicators

INDICATOR	DEFINITION
Total Renewable Water Resources, Annual (m^3)	Annual total internal renewable water resources (IRWR) plus annual external renewable water resources (ERWR), expressed in terms of cubic metres. It corresponds to the maximum theoretical yearly amount of water available for a country at a given moment.
Total Renewable Water Resources per Capita, Annual (m^3)	Total annual renewable water resources per person, expressed in terms of cubic metres.
Total Internal Renewable Water Resources (IRWR), Annual (m^3)	Long-term average annual flow of rivers and recharge of aquifers generated from endogenous precipitation, expressed in terms of cubic metres.
Total External Renewable Water Resources (ERWR), Annual (m^3)	Long-term average annual renewable water resources that are not generated in the country, expressed in terms of cubic metres. May be negative when the flow reserved to downstream countries is more than the incoming flow.
Total Renewable Groundwater, Annual (m^3)	Internal renewable groundwater resources plus total external renewable groundwater resources, expressed in terms of cubic metres.
Total Renewable Surface Water, Annual (m^3)	Annual internal renewable surface water resources plus annual external renewable surface water resources, expressed in terms of cubic metres.
Water Dependency Ratio (%)	Portion of total renewable water resources originating outside the country, expressed in terms of percentage.
Level of Water Stress: Freshwater Withdrawal as a Proportion of Available Freshwater Resources (%)	Freshwater withdrawal as a proportion of available freshwater resources. It is the ratio between total freshwater withdrawn by all major sectors and total renewable freshwater resources, after taking into account environmental flow requirements.
Total Dam Capacity (km^3)	Sum of the theoretical initial capacities of all dams, expressed in terms of cubic kilometres.
Long-Term Precipitation, Depth, Annual Average (mm)	Long-term average (over space and time) of annual endogenous precipitation (produced in the country) in depth, expressed in millimetres.
Long-Term Precipitation, Volume, Annual Average (m^3)	Long-term average (over space and time) of annual endogenous precipitation (produced in the country) in volume, expressed in terms of cubic metres.

YOUTH

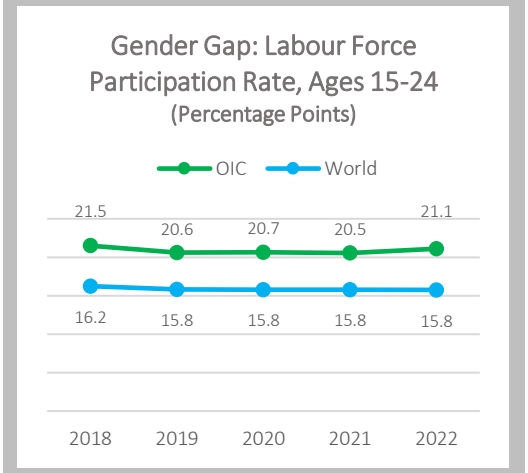

22. YOUTH

Youth labour force participation rate in the OIC has been below the global average

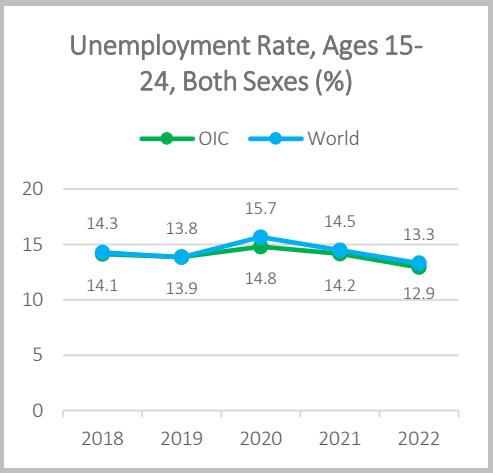

See Table 22.1

Gender gap in youth labour force participation has been wider in the OIC compared to the world

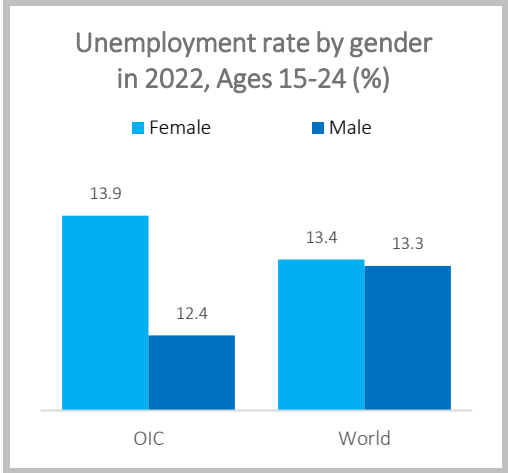

See Tables 22.2-22.3

In 2022, youth unemployment returned to pre-pandemic levels both in the OIC and globally

See Table 22.7

In 2022, female youth unemployment in the OIC was much higher than that of males, contrary to global trends

See Tables 22.8-22.9

Social Development

Table 17.1: Aggregate Human Development Index (HDI) values for OIC were calculated by applying the HDI formula to the weighted group averages of component indicators. Life expectancy and GNI per capita were weighted by total population, expected years of schooling was weighted by population ages 5-24 and mean years of schooling was weighted by population ages 25 and older. Population data were extracted from the United Nations Population Division (UNPD), World Population Prospects. The most recently revised historical data available and the same methodology applied to compute 2022 HDI values (UNDP, 2024) were used for computing the Human Development Index trends, 2000–2022. Therefore, the trend provides a time series of HDI values allowing 2022 HDI values to be compared with those for previous years.
