About the OIC

The Organization of Islamic Cooperation (OIC) is the second largest organization after the United Nations with a membership of 57 Countries spread over four continents. The Organization is the collective voice of the Muslim world. It endeavors to safeguard and protect the interests of the Muslim world in the spirit of promoting international peace and harmony among various people of the world. The Organization was established upon a decision of the historical summit which took place in Rabat, Kingdom of Morocco on 12th Rajab 1389 Hijra (25 September 1969).

Over the last 40 years, the membership has grown from its founding members of 30 to 57 Member Countries. They are Afghanistan, Albania, Azerbaijan, Bahrain, Bangladesh, Benin, the United Arab Emirates (UAE), Brunei Darussalam, Burkina Faso, Algeria, Djibouti, Chad, Indonesia, Morocco, Cote d'Ivoire, Palestine, Gabon, The Gambia, Guinea, Guinea Bissau, Guyana, Iraq, Iran, Cameroon, Qatar, Kazakhstan, Kyrgyzstan, the Comoros, Kuwait, Libya, Lebanon, Maldives, Malaysia, Mali, Egypt, Mauritania, Mozambique, Niger, Nigeria, Uzbekistan, Pakistan, Senegal, Sierra Leone, Somali, Sudan, Surinam, Syria, Saudi Arabia, Tajikistan, Togo, Tunisia, Türkiye, Turkmenistan, Uganda, Oman, Jordan, Yemen.

Observer Countries: Bosnia and Herzegovina, Central African Republic, Kingdom of Thailand, The Russian Federation and the Turkish Republic of Northern Cyprus (TRNC).

Muslim Communities / Organization/Islamic Institutions: Moro National Liberation Front and Parliamentary Union of the OIC Member States - PUOICM

International Organizations: United Nations (UN), Non-Aligned Movement (NAM), League of Arab States (LAS), African Union (AU) and Economic Cooperation Organization (ECO).

About COMCEC

The Standing Committee for Economic and Commercial Cooperation of the Organization of the Islamic Cooperation (COMCEC) is the main multilateral economic and commercial cooperation platform of the Islamic world. COMCEC serves as a central forum to address the common development problems of the Islamic Ummah and provide solutions to them. As one of the four Standing Committees of the OIC, COMCEC was established by the Third Islamic Summit Conference held in Mecca/Taif, in 1981. It became operational at the Fourth Islamic Summit Conference held in Casablanca, Kingdom of Morocco, in 1984, with the election of the President of the Republic of Türkiye to its Chairmanship and convening of its first ministerial level meeting in the same year. COMCEC has 57 Member Countries as well as 5 Observer Countries which are spread over four continents.

COMCEC convenes annually, usually in October or November, at ministerial level in İstanbul, Türkiye under the Chairmanship of the President of the Republic of Türkiye. So far, it has regularly convened 40 Sessions. COMCEC has initiated many programs/projects and successfully implemented most of them. Please see the **COMCEC Progress Report** since 2013 for more details. Click for the **Reports** of the COMCEC Ministerial Sessions.

PREFACE

The 2024 Trade Outlook is the continuation of the regular COMCEC's annual trade outlook publications, and the overall objective of this publication is to provide an overview of international trade and that of the Organization of the Islamic Cooperation (OIC) Member States. It focuses on trends and characteristics of intra-OIC trade and attempts to identify major trade drivers and common obstacles hindering trade during 2024.

The outlook is composed of thirteen chapters, elaborating world merchandise and service trade (Chapter 1-5); OIC merchandise and service trade (Chapter 6-9); Intra - OIC merchandise trade (Chapter 10-11); State of Palestine's merchandise and service trade (Chapter 12); Impact factors of merchandise and service trade (Chapter 13). All chapters of the outlook consist of figures, tables, maps and analytical text for world, regional, and selected trade or economic groupings, where required. The data used in the tables and figures in this outlook are taken from the publicly available mostly from the databases of ITC and UNCTAD complemented by the databases of OIC SESRIC, OECD, WTO, IMF, World Bank and UN Comtrade databases. As indicated in the ICT database, UNCTAD, ITC, WTO trade in services database based on Eurostat, International Monetary Fund, Organization for Economic Co-operation and Development (OECD) and relevant national statistical authorities' statistics[1]. Users are advised to visit these databases for additional and comprehensive information as it is continuously updated.

This outlook has been prepared by Mr. Ercan SAKA, COMCEC Trade Consultant, with the support and direction of the COMCEC Coordination Office (CCO) and published in November 2025.

The views and opinions expressed in the report are solely those of the author and do not represent the official views of the COMCEC Coordination Office or the Member States of the OIC. The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the COMCEC/CCO concerning the legal status of any country, territory, city or area, or of its authorities, or concerning the delimitation of its political regime or frontiers or boundaries. Designations such as "developed," "developing" and "least developing" are intended for statistical convenience and do not necessarily express a judgment about the stage reached by a particular country or area in the development process.

Excerpts from the report can be made if references are provided. All intellectual and industrial property rights for the report belong to the COMCEC Coordination Office.

DISCLAIMER

The tables, figures, information, and text contained in this publication are provided only for illustration and despite all efforts might contain errors. When using these statistics users are advised to verify the latest information available in the above-mentioned trade databases which are the source of these statistics.

The statistical data made publicly available and utilized in this publication are collected and tabulated by the relevant international and regional authorities as mentioned above. The correctness of this data is the responsibility of these relevant statistical data handlers. In line with the practice of several inter-governmental organizations such as the ITC, OECD, OIC SESRIC, UNCTAD, WTO, this publication also uses the same names of members or regions as listed and used by these authorities.

It is important to note that the references to other geographical territories and groupings are based solely on terms provided to the databases or publications developed by the relevant international organizations or terms used by the most relevant international organizations. The use of such data and terms does not constitute or imply an expression of opinion by the COMCEC concerning the status of any country or territory, or the delimitation of its frontiers, or sovereignty. The colors, boundaries, and names shown, and the designations used in this publication do not imply any judgment, official endorsement, or acceptance by the COMCEC Secretariat as to the legal status or frontier of any territory, or the rights and obligations of any.

Unless otherwise indicated,

(i) All value figures are expressed in U.S. dollars.

(ii) Trade figures include the intra-trade of free trade areas, customs unions, geographical and other groups.

(iii) Merchandise trade figures are on a customs basis and

(iv) Merchandise exports are FOB and merchandise imports are CIF.

TABLE OF CONTENTS

INTRODUCTION 17

CHAPTER 1. OVERVIEW 19

1.1 Scope 19
1.2 World exports and imports 19
1.3 Annual changes 20
1.4 World Trade Balance 22

CHAPTER 2. WORLD MERCHANDISE EXPORTS 23

2.1 Volume and worth 23
2.2 Major merchandise exporters 23
2.3 Merchandise exports by region 25
2.4 Merchandise exports by developed, developing and LCD countries 25
2.5 Type of exported merchandise 26
2.6 Petroleum product exports 27

CHAPTER 3. WORLD MERCHANDISE IMPORTS 30

3.1 Volume and Growth 30
3.2 Major merchandise importers 30
The following chart is provided to show the negative trade balance of the major merchandise importers besides their distance to supplying markets. 32
3.3 Merchandise imported by regions 32
3.4. Merchandise imports by development level of countries 33
3.5 Mostly imported products 34

CHAPTER 4. WORLD SERVICE EXPORTS 35

4.1. Volume and growth 35
4.2 Major service exporters 35
4.3 Service exports by regions 36
4.4 Service exports by developed, developing and LCD countries 37
4.5 Major types of services exported. 37

CHAPTER 5. WORLD SERVICE IMPORTS 38

5.1 Volume and growth 38
5.2 Major service importers 38
5.3 Service imports by region 39
5.4 Major types of service imported. 40
5.5 Service imports by developed, developing and LDC countries 40

CHAPTER 6. OIC MEMBER COUNTRİES MERCHANDISE EXPORT 41

6.1 Volume and growth 41
6.2 Major merchandise exporters 42
6.3 OIC export partner countries 44
6.4 Major products exported by OIC Member Countries. 45

CHAPTER 7. OIC MEMBER COUNTRİES MERCHANDISE IMPORT 46
7.1 Imports volume and growth 46
7.2 Major OIC merchandise importers 48
7.3 OIC import partner countries 49
7.4 Major imported products groups 50
CHAPTER 8. OIC MEMBER COUNTRİES SERVICE EXPORT 51
8.1 Volume and growth 51
8.2 Major OIC service exporters 52
8.3 Type of service exported 53
CHAPTER 9. OIC MEMBER COUNTRİES SERVICE IMPORT 54
9.1 Volume and Growth 54
9.2 Major OIC service importers 55
9.3 Type of service imported 56
CHAPTER 10. INTRA-OIC MERCAHANDISE EXPORTS 57
10.1 Volume and growth 57
10.2 Major intra-OIC merchandise exporters 57
10.3 Mostly exported intra-OIC merchandise 58
CHAPTER 11. INTRA – OIC MERCHANDISE IMPORTS 59
11.1 Volume and growth 59
11.2 Major intra-OIC merchandise importers 60
11.3. Mostly imported intra-OIC merchandise 62
CHAPTER 12. STATE OF PALESTINE 63
12.1 Economic and Trade Overview 63
12.2 Palestine's merchandise imports 63
12.2.1 Volume and growth 63
12.2.2 Major importing partners 64
12.2.3 Major imported product categories 65
12.3 Merchandise export 65
12.3.1 Volume and growth 65
12.3.2 Major exporting partners 66
12.3.3 Mostly exported products 66
12.4 Palestine service export and import 67
12.4.1 Type of service exported and imported 67
Chapter 13. IMPACT FACTORS 70
13.1 General factors 70
13.2 World Merchandise trade related factors 71

13.3 World Service trade related factors 71
13.4 Impact factors of OIC merchandise trade in 2024 71
13.5 Impact factors on OIC services trade in 2024 72

INTRODUCTION

International trade mostly refers to the voluntary exchange of goods and services among nations, enabling countries to capitalize on their comparative advantages and boosting efficiency, growth, and investment. While it brings many benefits—such as lower prices, job creation, and technological diffusion—it also faces challenges like tariff escalations, protectionism, market volatility, disturbing factors in supply chain, regulatory tension and trade related bilateral and multilateral agreement e.g. EU's Carbon Border Adjustment Mechanism (CBAM)[2] and The Agreement on Climate Change, Trade and Sustainability (ACCTS)[3] and The EU and Mercosur countries (Argentina, Brazil, Paraguay, Uruguay) concluded a long-awaited deal in 2024, including environmental safeguards.

The share of the OIC Member Countries in global merchandise trade was not substantially changed but there are several initiatives, particularly trade related agreements between the OIC Member Countries are well noted such as UAE–Morocco finalizing a Comprehensive Economic Partnership Agreement (CEPA), Qatar–Iraq, Qatar–Uzbekistan, and Oman–Algeria deepening trade and investment ties via bilateral dialogue and agreements and UAE–Azerbaijan exploring enhanced cooperation in entrepreneurship, tourism, and renewable energy sectors

In statistical terms, the global trade reached about US $33 trillion in 2024, with goods accounting for approximately US $25 trillion and services making up US $8 trillion. Services trade particularly surged by 7–9%, contributing significantly to overall growth, while merchandise trade grew more modestly (~2–3.3%).

International trade can play a key role in generating economic growth, employment and development. However, many countries fail to benefit from international trade due to many challenges, including their undiversified economies and high trade costs.

Having high levels of heterogeneity and divergence in terms of geography, size, population and economic development, the OIC Member Countries have demonstrated significant differences with regards to trade performances. Moreover, many OIC Member Countries' exports depend heavily on primary commodities. As a result, lowering oil prices and other commodity prices negatively affected not only their export revenues but also growth and development. Hence, the need for pursuing policies aimed at diversifying exports and to expand export markets intensified to increase OIC Member Countries' resilience to external shocks and sustain their growth.

[2] EU's Carbon Border Adjustment Mechanism (CBAM): In effect since October 2023, CBAM is phasing in full application by 2026. It requires importers to report carbon emissions embedded in goods from selected sectors, with the aim of protecting EU climate ambitions.

[3] The Agreement on Climate Change, Trade and Sustainability (ACCTS) was signed on 15 November 2024 by Costa Rica, Iceland, New Zealand, and Switzerland, eliminating tariffs on hundreds of environmental goods and promoting eco-labeling and subsidy reform.

The Standing Committee for Economic and Commercial Cooperation of the Organization of the Islamic Cooperation (COMCEC) is the responsible platform within the OIC for enhancing economic and commercial cooperation among the Member States. Since the commencement of its activities in 1984, COMCEC has initiated numerous programs and projects towards increasing intra-OIC trade (trade among the Member States), addressing the problems faced in trade liberalization, trade facilitation, trade promotion and trade financing in the Member States. Among these programs and projects, the Trade Preferential System among the OIC Member States (TPS-OIC), which is the flagship project of the COMCEC on trade liberalization, is now operational.

To address the development challenges of the Member Countries more efficiently, the COMCEC Strategy was adopted by the Fourth Extra-Ordinary Islamic Summit Conference held on 14-15 August 2012 in Makkah Al-Mukarramah. Trade is one of the cooperation areas in the Strategy, with the strategic objective of increasing trade among the Member States. İdentifying trade liberalization, trade facilitation, trade promotion, and trade financing as the output areas, COMCEC aims at achieving strategy's targets through its implementation instruments namely Trade Working Group and COMCEC Project Funding.

The present document aims to provide a general outlook of the trade of OIC Member States and other individual economies by identifying common trends and impact factors as well as key challenges they face in increasing their trade. Despite their economic and social differences, these countries also face some similar obstacles such as protectionist trade regimes, dependency on limited types of commodity exports, burdensome customs procedures, regional and domestic political and economic instability, increasing the cost of transportation, limited access to regional and overseas markets, inadequate financial resources and underdeveloped financial systems.

Besides giving background information on the activities of the COMCEC for increasing intra-OIC trade, the document also considers the COMCEC Strategy for increasing trade and addressing the common obstacles faced by the Member States towards reaching this goal.

This Outlook has thirteen sections:

Chapter 1-5 give a general overview of the world merchandise and service trade

Chapter 6-9 provides a general overview of the OIC merchandise and service trade.

Chapter 10-11 concentrates on the intra - OIC merchandise trade

Chapter 12 gives a snapshot of the State of Palestine's merchandise and service trade

Chapter 13 overviews impact factors on merchandise and service trade

CHAPTER 1. OVERVIEW

1.1 Scope

This chapter is designed to highlight some of the significant merchandise and service trade developments and trends at the global level, covering their developments during the past five years (2020-2024).

It is important to note that at international trade related statistics, the merchandise-based data is collected and tabulated under the Customs Harmonized System (HS)'s 99 chapters as the service basis data is mostly collected and tabulated under a total of 11 categories (Manufacturing services on physical inputs owned by others; Maintenance and repair services; Transport; Travel; Construction; Insurance and pension services; Financial services; Charges for the use of intellectual property; Telecommunications, computers, and information services; Other business services and Personal, cultural, and recreational services)

For this outlook, most of the data are retrieved from the International Trade Centre (ITC), which is a multilateral agency, which has a joint mandate with the World Trade Organization (WTO) and the United Nations (UN) through the United Nations Conference on Trade and Development (UNCTAD).

1.2 World exports and imports

As the following tables no.1 and 2 illustrate the value of the global **export** of merchandese and services combined has been between USD 23 and USD 33 trillion in 2020-2024. During the same period, the value of the global **imports** of goods and services has been very close those of the exports and the difference between two values in 2024 was only $621 billion.

Table 1: Total Exports of Merchandise and Service in USD Thousand (2020-2024)

Exports of	2020	2021	2022	2023	2024
Merchandise	17,494,444,311	22,148,344,040	24,701,959,316	23,633,258,628	23,899,979,068
Service	5,320,263,199	6,404,799,756	7,414,659,224	8,035,807,819	8,812,755,280

The following figure also shows the closeness of the global service exports and imports values during the past five years.

Figure 2:World service exports and imports,2020-2024, USD in thousands

Source:ITC database

1.3 Annual changes

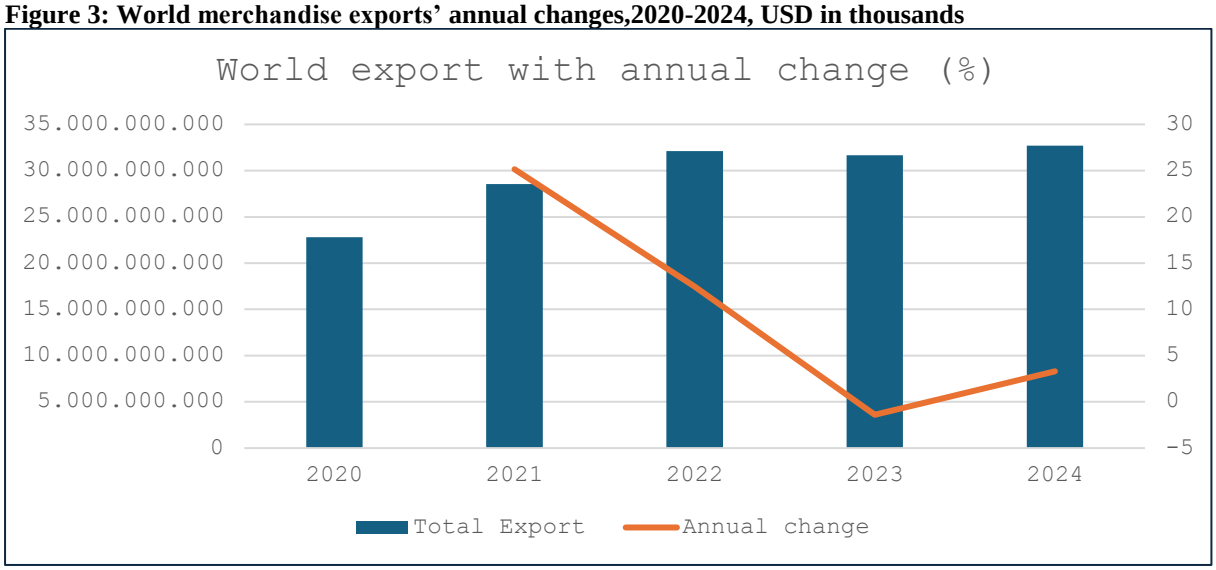

The year-to-year basis analysis indicated that the values of the global merchandise and service exports were no stable as shown at the table no.3 and figure no.3. The annual change was even went to -1% in 2023 and recovered in 2024 with 3% increase.

Table 3: World merchandise exports annual changes,2020-2024, USD in thousands

	2020	2021	2022	2023	2024
Total export	22,814,707,510	28,553,143,796	32,116,618,540	31,669,066,447	32,712,734,348
Annual change		25	12	-1	3

1.4 World Trade Balance

1.4.1 Merchandise basis trade balance

The merchandise trade balance for the past five years have always been negative,between USD -190 billion to USD-620 billion.The deficit or negative balance between merchandise import and export during 2022 was at the highest level (USD-620 billion). Although the trade balance deficit was almost 50% reduced in 2023 and 2024, it was stiil negative during the past two years (USD -313 billion in 2023 and USD -190 billion in 2024.

Table 5: Trade balance of World Merchandise,2020-2024, USD in thousands

Merchandise Trade	2020	2021	2022	2023	2024
Merchandise Export	17,494,444,311	22,148,344,040	24,701,959,316	23,633,258,628	23,899,979,068
Merchandise Import	17,727,610,451	22,450,819,760	25,322,777,860	23,946,292,315	24,090,360,830

CHAPTER 2. WORLD MERCHANDISE EXPORTS

2.1 Volume and worth

In 2024, the world merchandise exports totalled to USD 23,8 trillion. Comparing to the previos year (2023), the value of the world merchandise exports increased USD 266 billion or %1.1 in 2024.

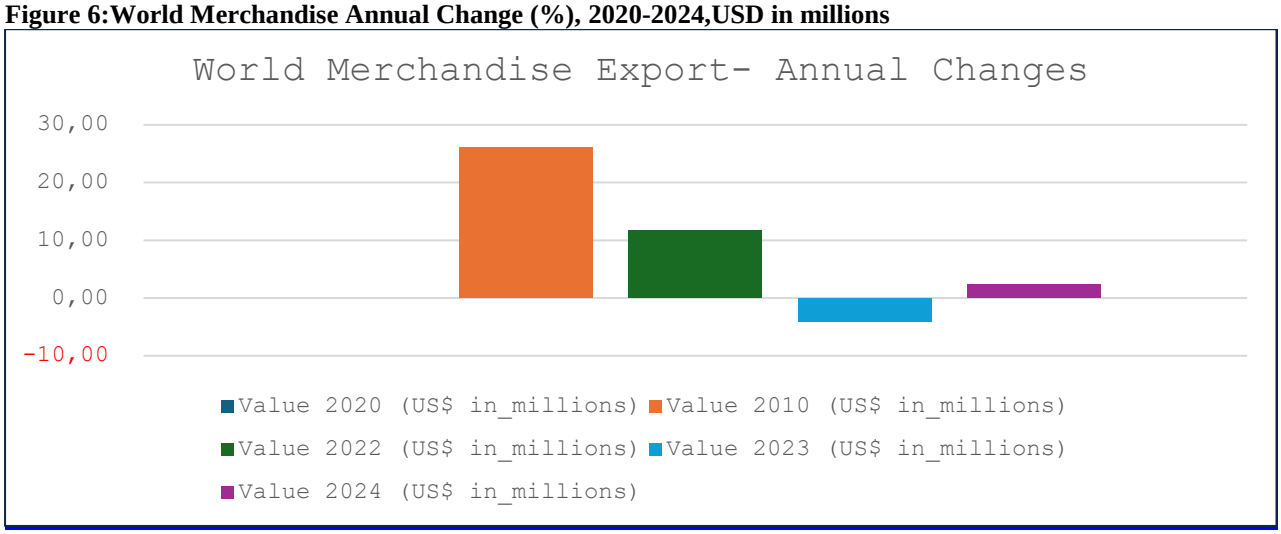

Table 7:World Merchandise Export ,2020-2024, USD in thousands

Exporters	2020	2021	2022	2023	2024
World	17,494,444,311	22,148,344,040	24,701,959,316	23,633,258,628	23,899,979,068
Annual Change (%)		26	11.7	-4	1.1

Source: ITC database

As the following figure illustrates, the annual change in the merchandise exports during the past five years were up and down. The 26% increase in 2021 decreased to11.7% in 2022 and then dropped to %-4 in 2023. The recovery to the positive value came in 2024 with %1.1 increase.

Figure 6:World Merchandise Annual Change (%), 2020-2024,USD in millions

Source : UNCTAD database

2.2 Major merchandise exporters

China, USA, Germany, Netherlands, Japan, ROK, Italy, Hong Kong-China,France and Mexico were the top ten countries of global merchandise exports of the past five years. Among these major economies, China with USD 3.5 trillion was the leading merchandise exporter country, followed by the USA with USD 2.0 trillion and Germany with USD 1.6 trillion in 2024.

As the table below shows, these top major ten economies kept their ranks during the past five years.On the other hand, among the over 230 individiual countries and territories, Malaysia, UAE, Saudi Arabia, Indonesia and Türkiye were the first five OIC Member Countries entered the top thirty global merchandise countries list with the rank numbers of 24,2,26,28 and 29 respectively.

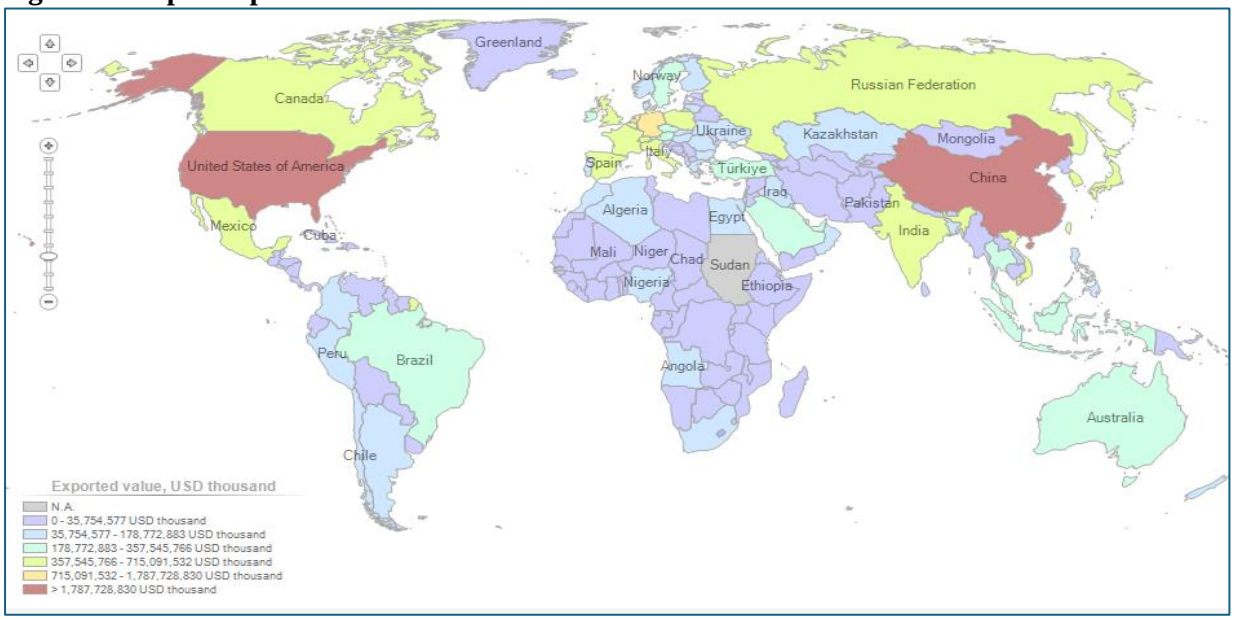

Table 8: Major World Merchandise Exporters,2020-2024, USD in thousands

Exporters	2020	2021	2022	2023	2024
World	17,494,444,311	22,148,344,040	24,701,959,316	23,633,258,628	23,899,979,068

Source :ITC database

The merchandise exports by the countries in 2024 are also shown in map style figure 7 where China and the USA with above USD 2 trillion export values are clearly highlighted.

Figure 7: Map of exported merchandise in countries in 2024.

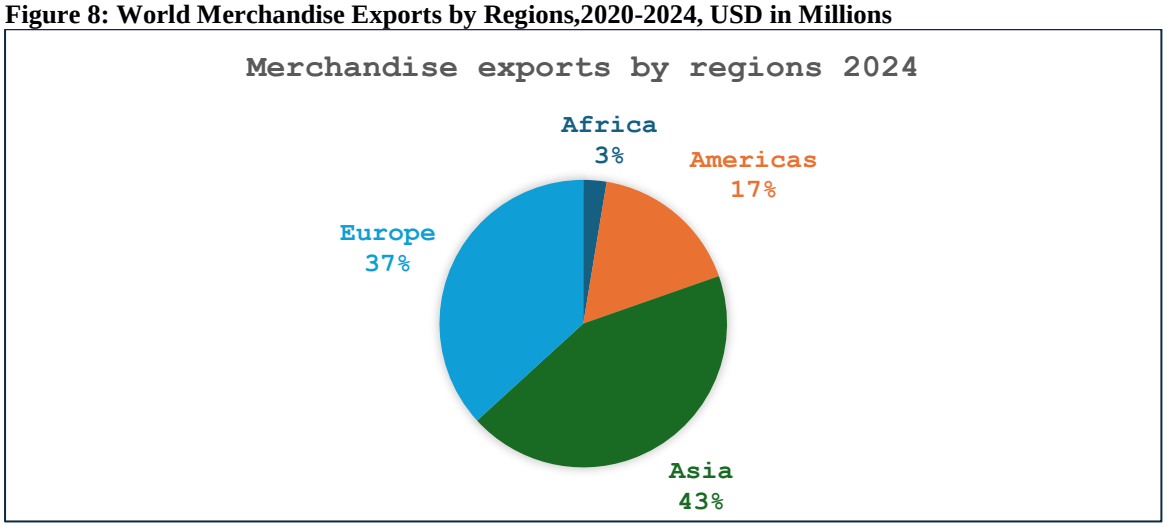

Source: ITC database-map

2.3 Merchandise exports by region

The analysis of world merchandise exports by regions during the same period indicated that Asia with USD 10.4 trillion was leading region and its share in the world merchandise exports was %42. Asia region was followed by Europe (USD 8.8 trillion), Americas (USD 4 trillion) and Africa (USD 627 billion).

Figure 8: World Merchandise Exports by Regions,2020-2024, USD in Millions

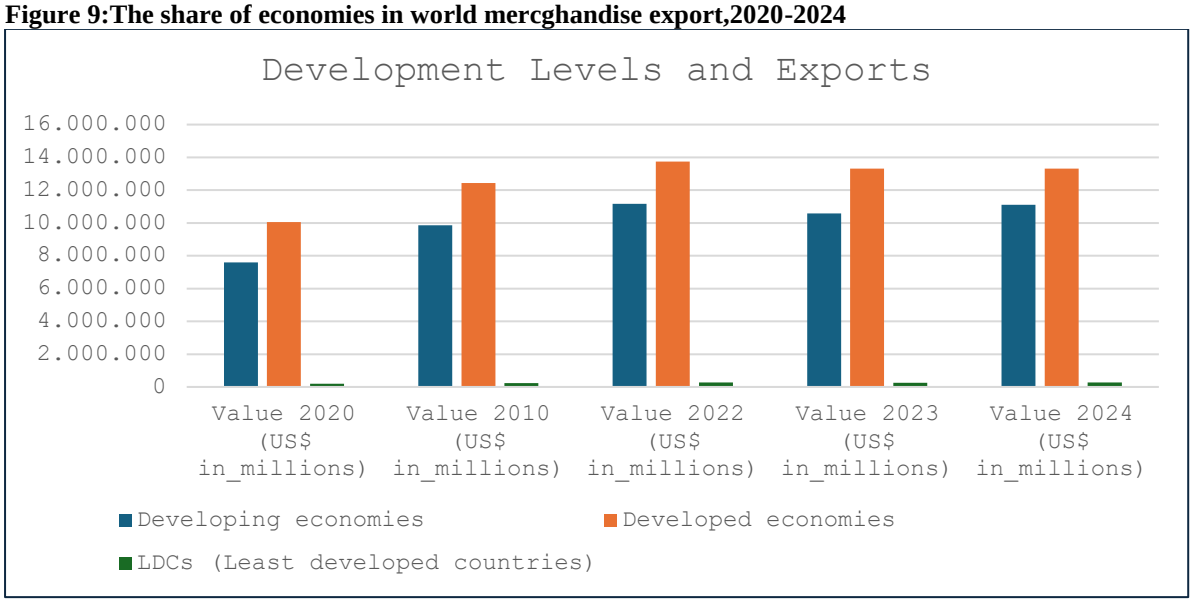

Source: UNCTAD database

2.4 Merchandise exports by developed, developing and LCD countries

The merchandise exports by developed countries during past five,including 2024, has reached to USD 13 trillion.This value was followed by developing countries(USD 11 trillion) and Least Developed Countries (LCD) with USD 266 billion only.

Figure 9:The share of economies in world mercghandise export,2020-2024

Share:UNCTAD database

2.5 Type of exported merchandise

The analysis of world merchandise export by product caegories shows that the items categorized under HS chapter 85 “Electrical machinery and equipment and parts thereof; television”were mostly exported merchandise by the over 200 countries during the past five years,including 2024. This merchandise group was followed by other four mostly exported product categories: “ Mineral fuels, mineral oils and products of their distillation; mineral ”, “ Nuclear reactors, boilers, machinery and mechanical appliances; parts thereof”, “ Vehicles other than railway or tramway rolling stock, and parts and accessories thereof” and finally “Natural or cultured pearls, precious or semi-precious stones, precious metals”.

Table 9: Mostly exported merchandise groups,2020-2024,USD in millions

HS code	Product label	imported value in 2020.	imported value in 2021	imported value in 2022	imported value in 2023	imported value in 2024
TOTAL	**All products**	**17,727,610,451**	**22,450,819,760**	**25,322,777,860**	**23,946,292,315**	**24,090,360,830**

2.6 Petroleum product exports

Due to the impact on world and national economies, the crude oil and petrolum product exports and its price during the past five years are briefly included into this chapter[4].

According to the Organization of the Petroleum Exporting Countries (OPEC), the The Organization of the Petroleum Exporting Countries (OECD) were the leading petroluem exporters and during the past five years and the petroleum exports by the OIC Member Countries reamined between 36%-40% of the entire petroleum exports.

Table 10:The petroleum products exports by OPEC and OIC,2020-2024, (1,000 b/d)

	2020	2021	2022	2023	2024
OECD countries	14,181	15,129	15,581	15,748	16,383
OPEC countries	3432	3970	4399	4775	5068
OIC Member Countries	5,155	5,795	6,095	6,602	6,608
OIC share in OECD production (%)	36	38	39	41	40

Source: https://publications.opec.org/asb/Download

According to the OPEC reference basket, the oil export prices during the same period was not stable and its barrel price in USD dropped from 94.55 US dollars in 2022 to 77.58 US dollars in 2023 and then 75.91 US dollars in 2024.

Table 11: OPEC Reference Basket, Brent and WTI prices ($/b),2020-2024

Price	2020	2021	2022	2023	2024
OPEC Reference Basket	41.47	69.89	100.08	82.95	79.89
Brent	41.67	70.8	101.1	82.57	80.64
WTI	39.43	68.17	94.55	77.58	75.91

Sources: Argus Media and OPEC Secretariat[5], as of 29092025.

The following table indicates that the total daily exports of petroleum products was 31,785,000 b/d and main exporters were USA, Netherlands, ROK, Singapore, India,Saudia Arabia, and UAE. The main petroleum product exporter during the past five years was the USA with daily exports level of 6,648(b/d).

4 All data is taken from the OPEC (Organization of Petroleum Exporting Countries) website

5 Brent Crude is the benchmark used for the light oil market. West Texas Intermediate (WTI) is a grade or mix of crude oil; the term is also used to refer to the spot price, the futures price, or assessed price for that oil.

CHAPTER 3. WORLD MERCHANDISE IMPORTS

3.1 Volume and Growth

As the following table no.14 and figure 10 shows, the value of the global merchandise imports was about USD 24 trillion,slightly higher that the value of 2023 (USD 23.9 trillion) but less than the value of 2022 (USD 25.3 trillion).

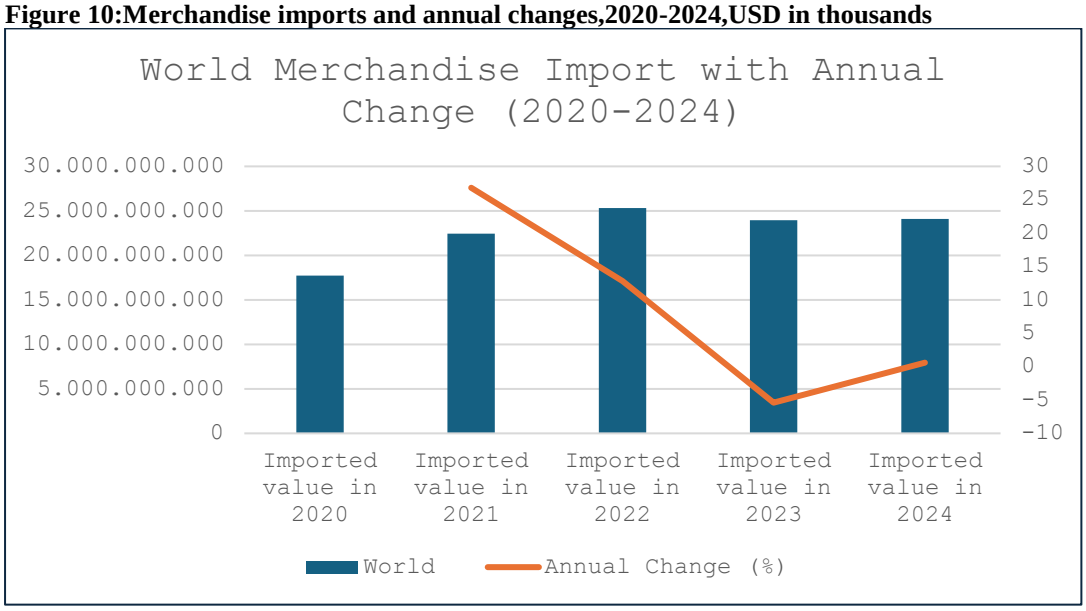

Table 14:World Merchandise Import with annual change, 2020-2024, USD in thousands

Importers	Imported value in 2020	Imported value in 2021	Imported value in 2022	Imported value in 2023	Imported value in 2024
World	17,727,610,451	22,450,819,760	25,322,777,860	23,946,292,315	24,090,360,830
Annual Change (%)		26.8	12.8	-5.4	0.6

Source: ITC database

The year-to-year change analysis of the past five years also shows that the imported value of merchandise sharply dropped from 26.8% in 2021 to firstly 12.8% in 2022 and then -5.4% in 2023, until it was turned into the positive percentage in 2024.

Figure 10:Merchandise imports and annual changes,2020-2024,USD in thousands

Source: ITC database

3.2 Major merchandise importers

Among the over 200 countries and territories, the top 10 merchandise importer countries were from America (USA), Europe (Germany, UK, France, Netherlands) and Asia (China, Japan, India, Hong Kong-China, and ROK) region and led by the USA with approximately USD 3.3 trillion in 2024. The USA was followed by China (USD 2.6 trillion) and Germany (USD 1.4 trillion) with the values over USD1 trillion during the same year. The relevant trade data set also indicates that the top three countries constitute approximately %30.6 of the entire world merchandise imports during 2024.The further analysis indicates that Türkiye, UAE, Malaysia, Indonesia and Saudi Arabia were the only five OIC member countries entered the list of the first 30 major merchadise importers with the rank of 21,22,24,27 and 28 respectively.

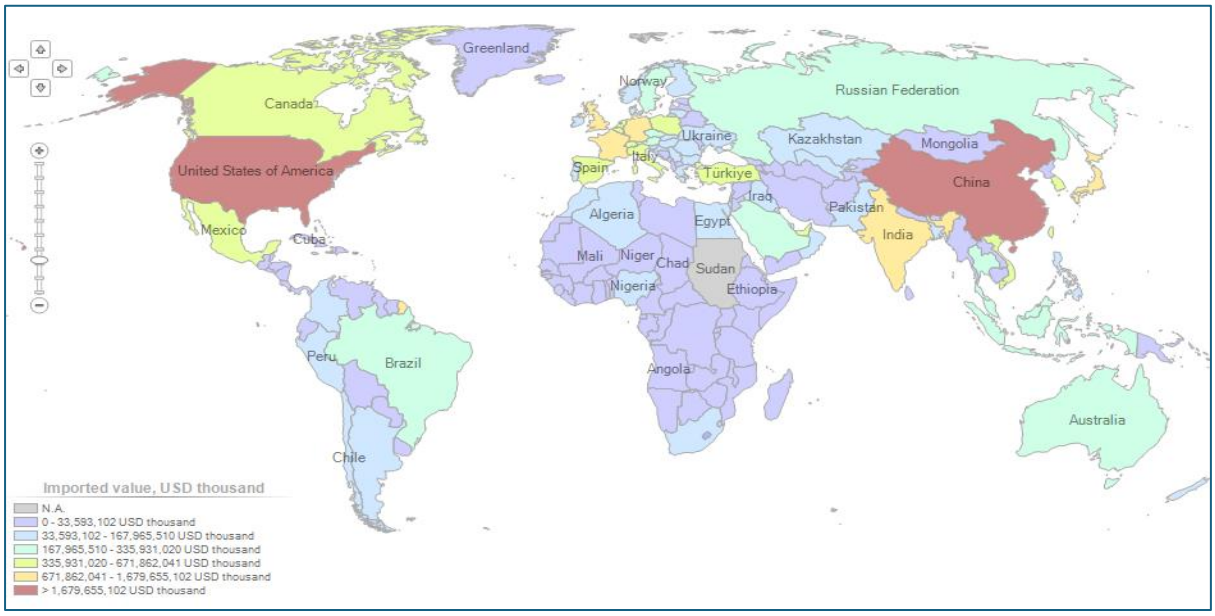

Table 15:Major World Merchandise Importers,20202-2024, USD in thousands

Importers	Imported value in 2020	Imported value in 2021	Imported value in 2022	Imported value in 2023	Imported value in 2024

Source :ITC database

The map below designed by the ITC to illustrate the global merchandise importers are clearly indicates the major two merchandise importers: the USA and China.

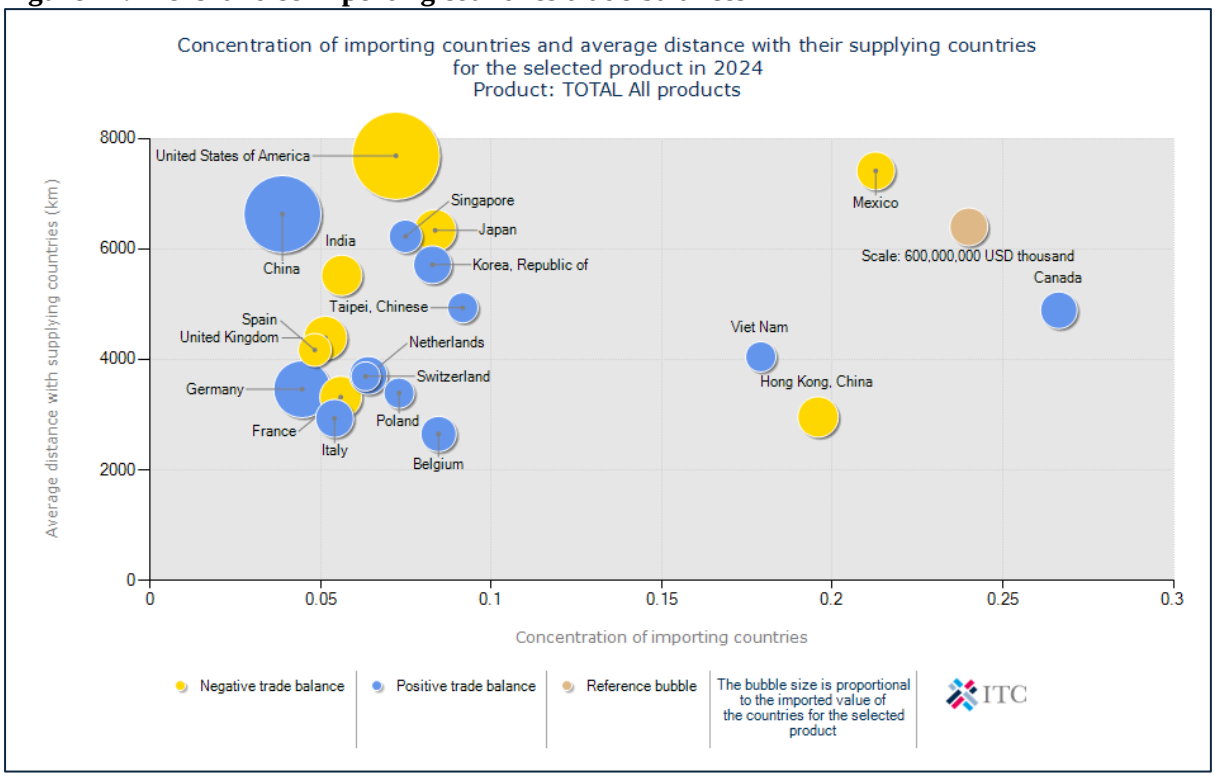

Figure 11: World Merchandise importers map,2020-2024, USD in thousands

Source: ITC database-map

The following chart is provided to show the negative trade balance of the major merchandise importers besides their distance to supplying markets.

Figure 12: Merchandise importing countries trade balances

Source: ITC database

3.3 Merchandise imported by regions

The breakdown of the merchandise imports by major regions indicates that Asia with USD 9.5 trillion was the leadig merchandise importer region during the past five years and closely followed by Europe region with USD 8.6 trillion.These regions are followed by Americas (USD 5.4 trillion), Africa (USD 752 billion) and lastly by Ocenia (USD 360 billion). The share of the total mercandise import value of Asia and Europe together was around %75 of the entire merchandise imports of 2024.

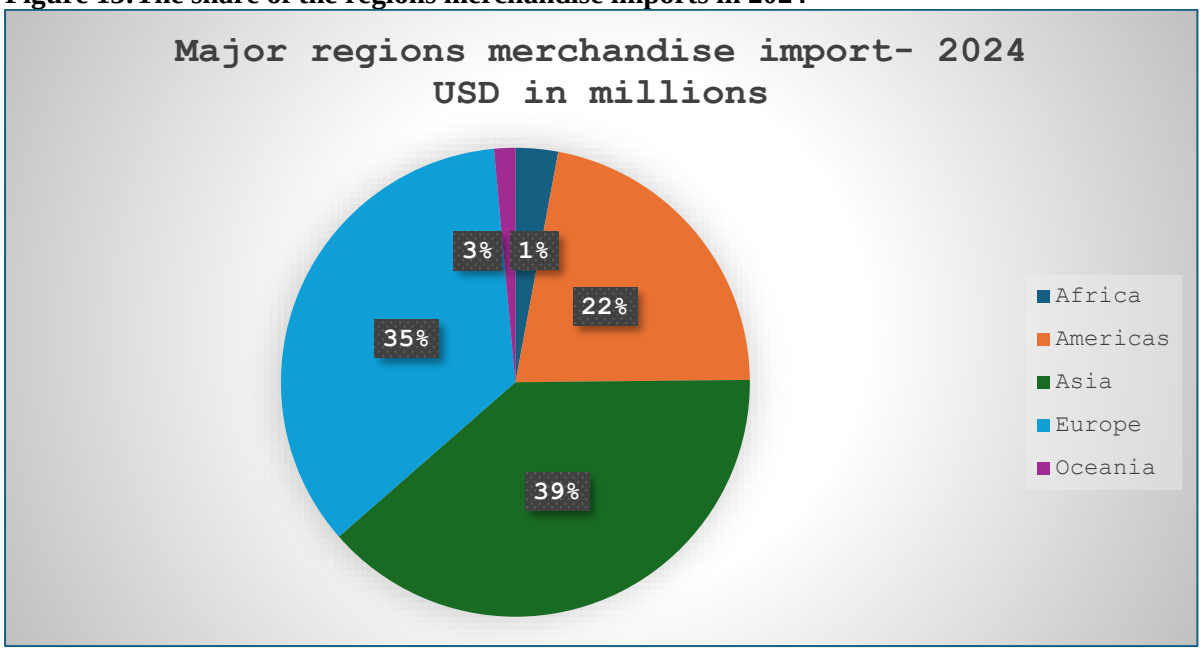

Table 16:Major merchandise importing regions,202-2024,USD in millions

Major regions	2020	2021	2022	2023	2024
World	17,727,610,451	22,450,819,760	25,322,777,860	23,946,292,315	24,090,360,830
Africa	490,559	615,429	738,468	715156	725,748
Americas	3,753,359	47,12,220	550,1854	5,189,049	5,421,243
Asia	6,821,770	8,809,661	9,798,462	9,203,578	9,582,926
Europe	6,550,616	8,107,379	9,239,580	8,813,135	8,656,591
Oceania	262,507	326,812	383,135	357,080	360,533

Source: UNCTAD database

The following figure represents the above five regions' share in the global merchandise imports during the year 2024.The Asia region with 39% of the entire merchandise exports of 2024 was exceeding the share of America, Africa and Ocenia.

Figure 13:The share of the regions merchandise imports in 2024

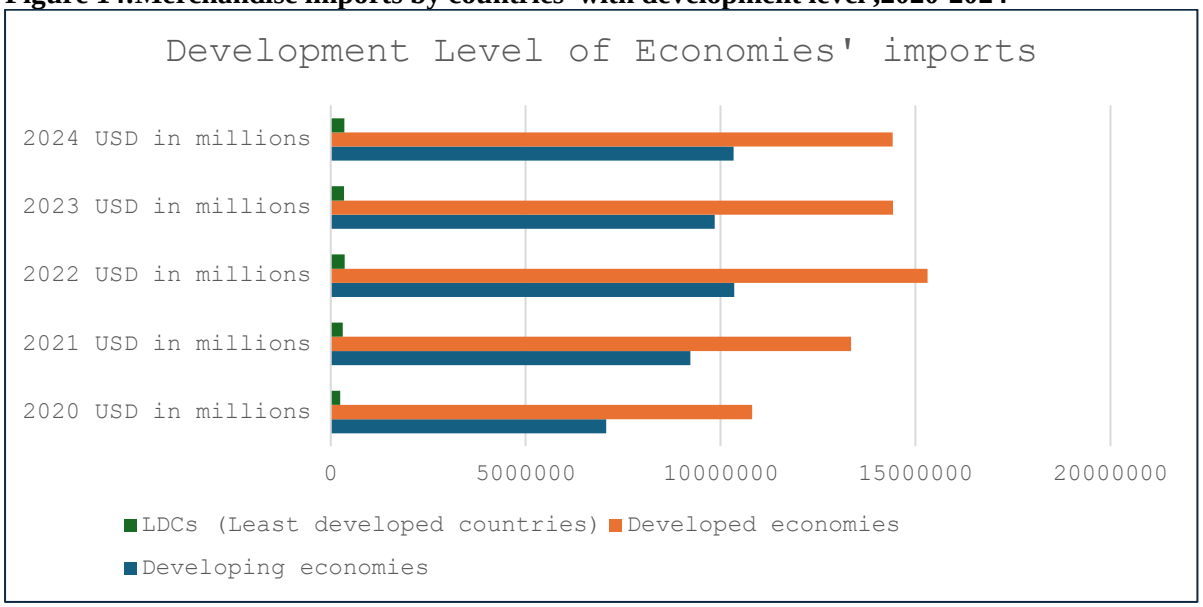

Source: UNCTA database

3.4. Merchandise imports by development level of countries

Development level basis analysis indicated that the developed economies have been the leading of the global merchandise imports during the past five years and the LCDs countries' share in the global merchandise import have never been above USD 500 billion during 2020-2024. As the chart no.14 ishows this values were USD 14.4 trillion for developed and USD 10.3 trillion for developing economies in 2024.

Figure 14:Merchandise imports by countries with development level ,2020-2024

Source : UNCTAD database

3.5 Mostly imported products

Among the 99 product categories (or HS chapters), the top or mostly imported products were “electical machinery and equipment and parts thereof; television” under the HS chapter 85 with the value of USD 3.7 trillion. This product category’s value was USD 3.6 trillion in 2023, USD 3.8 trillion in 2022 and the lowest figure was USD 2,9 trillion in 2020.

As the table no.17 shows, this product category was followed by “Mineral fuels, mineral oils and products of their distillation; mineral (HS chapter 27)”, “Nuclear reactors, boilers, machinery and mechanical appliances; parts thereof (HS chapter 84)”, “Vehicles other than railway or tramway rolling stock, and parts and accessories thereof (HS chapter 87)” and “Natural or cultured pearls, precious or semi-precious stones, precious metals (HS chapter 71)” during the past five years, including 2024.

Table 17: Mostly imported 5 top product categories,2020-2024,USD in thousands

CHAPTER 4. WORLD SERVICE EXPORTS

4.1. Volume and growth

According to the ICT database, the value of the world service during the past five years has been positive, starting from USD 5 trillion in 2020 reaching USD 8.8 trillion in 2024.

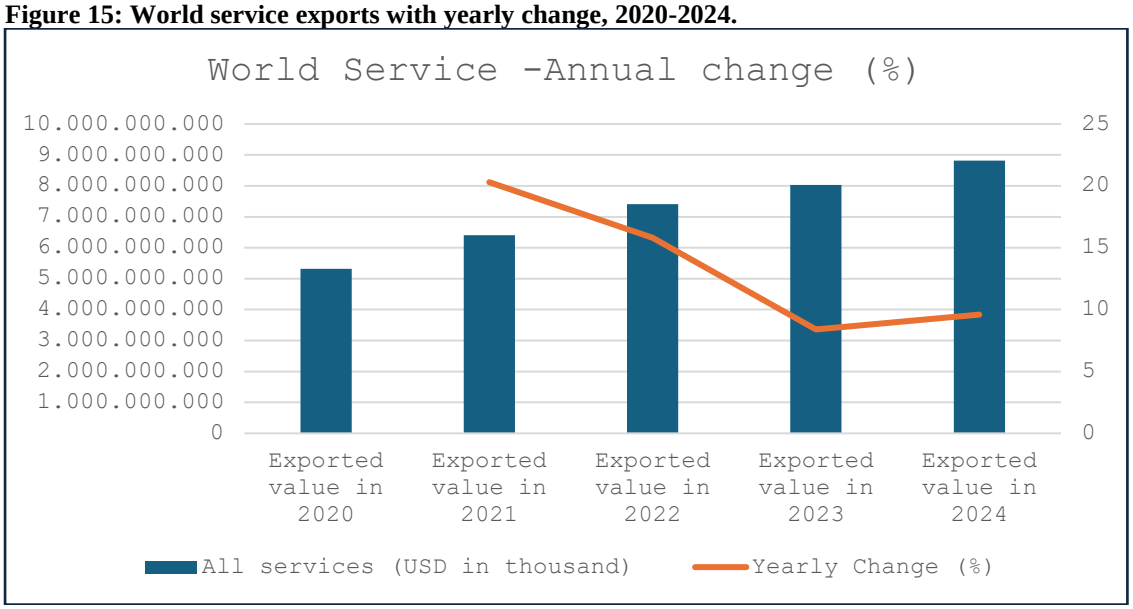

Table 18: World service exports,2020-2024 with year-to-year changes

Service Export	Exported value in 2020	Exported value in 2021	Exported value in 2022	Exported value in 2023	Exported value in 2024
All services	5,320,263,199	6,404,799,756	7,414,659,224	8,035,807,819	8,812,755,280
Yearly Change (%)	-	20.3	15.8	8.4	9.6

Source: ICT database

Comparing the previous year (2023), the world service export value increased approximately USD 777 billion. This value represents about 9.6 % annual change, but this was less than the annual increase seen in 2021 (20.35) and 2022 (15.8%).

Figure 15: World service exports with yearly change, 2020-2024.

Source: ICT database

4.2 Major service exporters

The global service-based trade data also shows that the top 10 major service exporter countries during the past five years were the USA, UK, Ireland, Germany, China, France, Singapore, India, Netherlands and Japan. Among these countries, the USA with over USD 1 trillion is the leading service exporter country during the past five years, including 2024. Compared to the year 2023, all these countries' service exports increased and this increase for the leading country, USA, was about USD 108 billion.

These ten major service exporters constitute 56% of the entire world service exports of 2024. The general trend of global service exports by the ten major exporters during the past five years was upward.

From the 57 OIC members, only The UAE and Türkiye were the two OIC Member Countries entered the first top 20 global exporter countries.

Table 19: Top service exporters,2020-2024, USD thousand

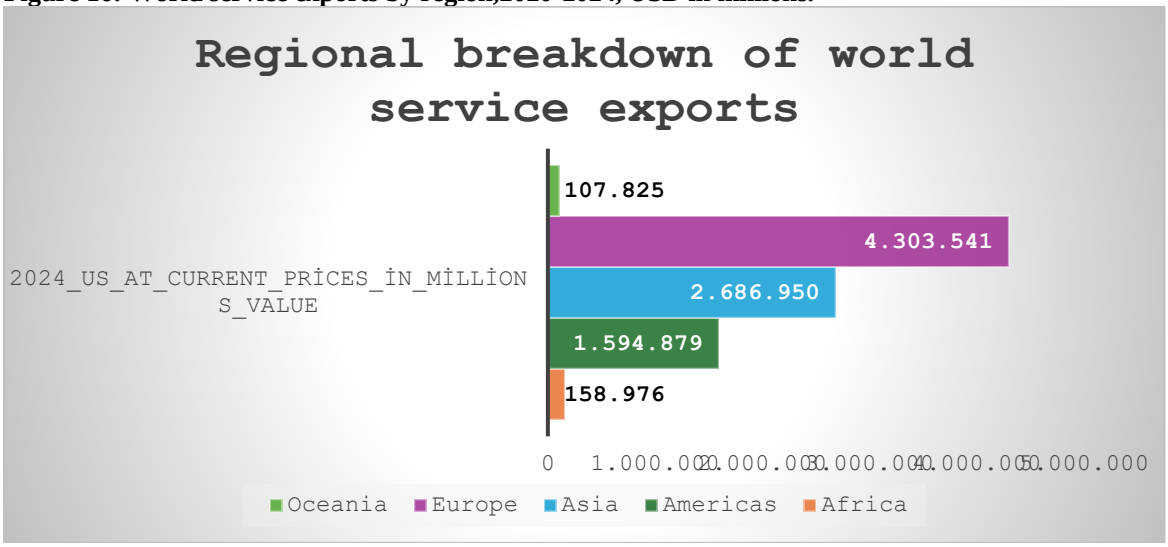

Exporters	Exported value in 2020	Exported value in 2021	Exported value in 2022	Exported value in 2023	Exported value in 2024
All services	5,320,263,199	6,404,799,756	7,414,659,224	8,035,807,819	8,812,755,280

Source: ITC database

4.3 Service exports by regions

As the figure no.16 shows, the regional basis analysis of global service exports during 2020-2024 indicates that Europe with 49% share or with USD 4,3 trillion was the major region among the other five regions. Europe was followed by Asia (USD 2.6 trillion), America (USD 1.5 trillion), Africa (USD 158 billion) and Oceania (USD 107 billion) regions.

Figure 16: World service exports by region,2020-2024, USD in millions.

Source: UNCTAD database

4.4 Service exports by developed, developing and LCD countries[6]

According to the UNCTAD database, the developed countries' service exports during the past five years, including 2024, have been more than the total value of the service exports by developing and least developed countries (LDCs). In 2024, the share of the developed countries in the global service export was 70% while the share of the 44 LDC's service export was only 0.05% or simply USD 52 billion.

Table 20: Service exports by developed, developing and LCD countries, USD in millions

Economies	2020	2021	2022	2023	2024
Developing economies	1,374,291	1,730,111	2,189,384	2,379,711	2,650,010
Developed economies	3,947,158	4,676,991	5,233,116	5,676,385	6,202,162
LDCs (Least developed countries)	32,722	35,797	43,675	46,758	52,113

Source: UNCTAD database

4.5 Major types of services exported.

The most exported service category at global level during the past five years were "other business service" which is composed of three subcomponents, namely: 'Research and development (R&D) services', 'Professional and management consulting services', and 'Technical, trade-related and other business services'.[7]

The share of the top service category in the entire global service exports in 2024 was around 24%. This category is followed by other top four service categories: travel, transport, telecommunications and financial services with the share of19%, 16.5%, 14%, and 8.7% respectively. The export value of these top five service categories in 2024 accounted for approximately 83% of the entire or global service exports.

Table 21: Top five service categories exported at world level, 2019-2023, USD in thousands

Service label	Exported value in 2020	Exported value in 2021	Exported value in 2022	Exported value in 2023	Exported value in 2024
All services	5,320,263,199	6,404,799,756	7,414,659,224	8,035,807,819	8,812,755,280

CHAPTER 5. WORLD SERVICE IMPORTS

5.1 Volume and growth

As table no.22 and the figure no.17 below shows, the total value of the world service imports reached USD 8 trillion in 2024 and its trends during the five past years were in upward direction. Its value was slightly over USD 5 trillion in 2020, USD 5.8 trillion in 2021, USD 6.7 trillion in 2022 and USD 7.4 trillion in 2023.

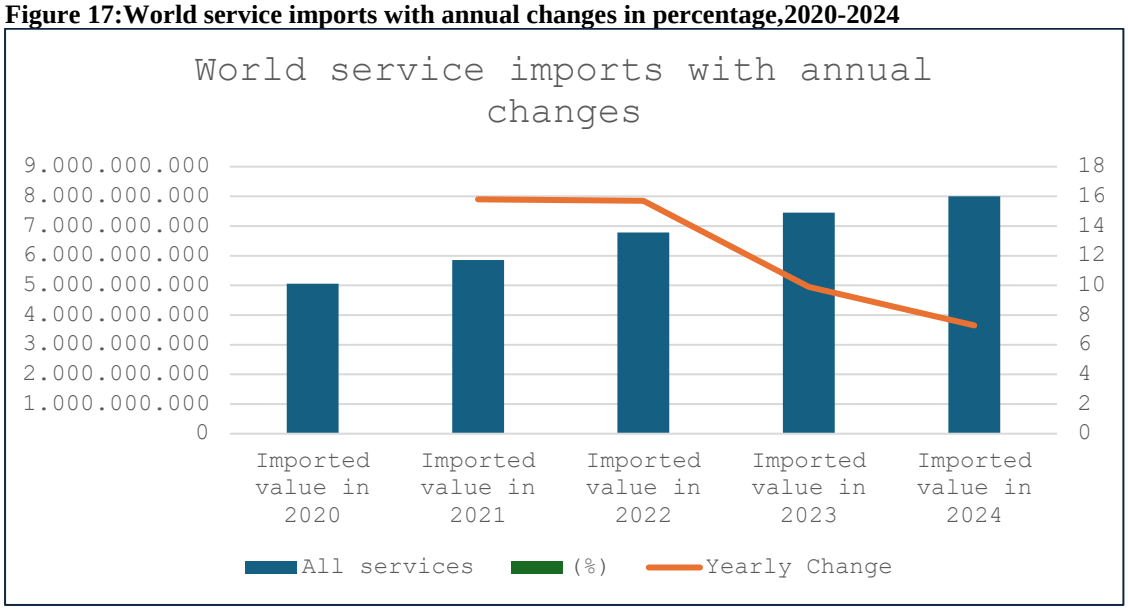

Table 22:World service imports ,2020-2024, USD million

	Imported value in 2020	Imported value in 2021	Imported value in 2022	Imported value in 2023	Imported value in 2024
All services	5,057,831,534	5,858,736,840	6,780,360,458	7,454,334,065	8,000,893,309
Yearly Change (%)		15.8	15.7	9.9	7.3

Source: ITC database

The year-to-year basis analysis indicates that the global service import increased by about 7.3% or USD 546 billion in 2024. This rate was 15.8% in 2021, 15.7% in 2022, 9.9% in 2023.

Figure 17:World service imports with annual changes in percentage,2020-2024

Source: ITC database

5.2 Major service importers

The international dataset on over 200 countries and territories' service imports for 2020-2024 shows that the USA, China, Germany, Ireland, UK, Singapore, France, Netherlands, India, and Japan were the top or major service importers and the USA with USD 840 billion was leading service importer country of the past five years, including 2024.

The same data set indicates that the value of the service imports of the top ten major service importers constituted about 55% of the entire or global value of the service imports of 2024. According to the ITC database, UAE and Saudi Arabia were only first two OIC member States entered the list as 21st and 23rd respectively.

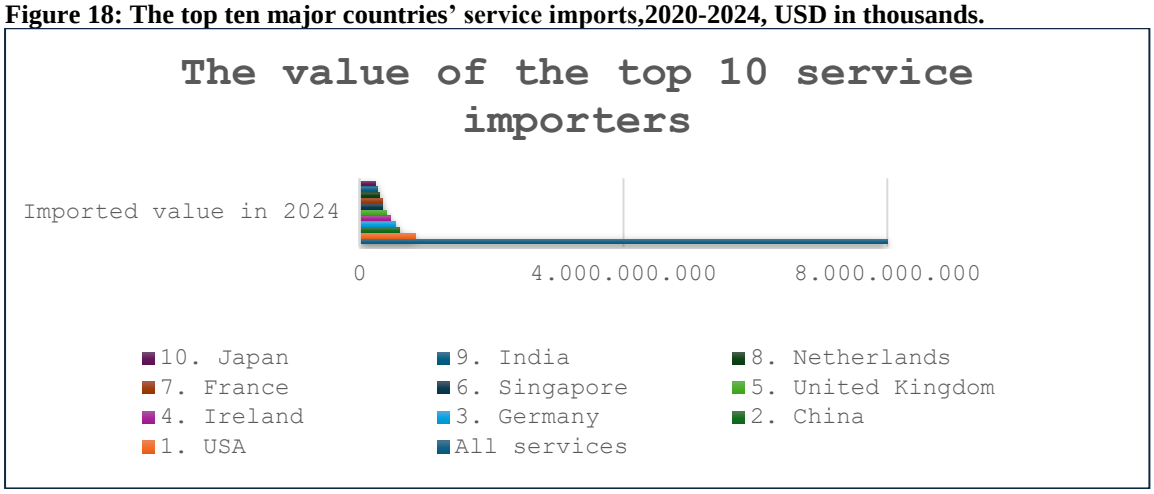

Table 23:Top 10 major service importers ,2019-2023, USD in thousands

Importers	Imported value in 2020	Imported value in 2021	Imported value in 2022	Imported value in 2023	Imported value in 2024

The top ten countries in the global service trade volume of 2024 are shown in a chart below.

Figure 18: The top ten major countries' service imports,2020-2024, USD in thousands.

Source: UNCTAD database[8]

5.3 Service imports by region

The five region-based service imports data indicates that Europe region was the major service importer and followed by Asia, America, Africa and Oceania regions during the past five years, including 2024. Although the entire dataset indicates that all regions' service imports were in upward trend during 2020-2024, Europe as a sole region represented 46% of the global service imports during the year 2024.

5.4 Major types of service imported.

According to the category of service-related datasets for 2020-2024, the top five globally imported service categories were “Other business”, “Transport”, “Travel”, “Telecommunications, computer, and information services” and “Charges for the use of intellectual property.” Among these five categories, "other commercial services" with 24% of the entire or global service imports was the most imported service category. The global service imports during the past five years have been in upward trend in each service category.

Table 25:Top 10 major service categories ,2020-2024, USD thousands

Service label	Imported value in 2020	Imported value in 2021	Imported value in 2022	Imported value in 2023	Imported value in 2024
All services	5,057,831,534	5,858,736,840	6,780,360,458	7,454,334,065	8,000,893,309

5.5 Service imports by developed, developing and LDC countries

According to the available service-based trade datasets, the developed, developing and least developed countries (LDCs) increased their service imports during the past five years but the total value of service exports of developed countries in each year was almost 100% higher than the values of the total service imports of developing and least developed countries as shown below.

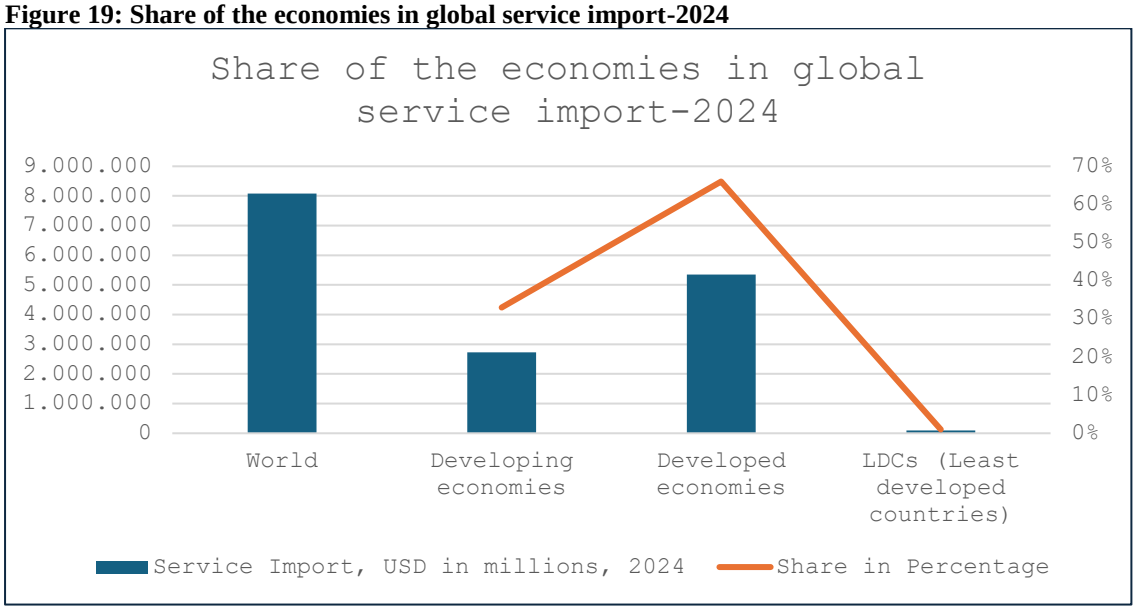

Table 26: Service imports by developed, developing and LDCs, USD millions

Economy	2020	2021	2022	2023	2024
World	5,058,627	5,859,878	6,798,150	7,478,990	8,078,610
Developing economies	1,618,715	1,893,047	2,265,064	2,514,489	2,730,615
Developed economies	3,439,913	3,966,832	4,533,086	4,964,501	5,347,995
LDCs	64,132	71,051	84,353	84,196	93,809

Source: UNCTAD database

The same dataset for the year 2024 indicates that developed countries share in the global service imports was 66% while developing countries and LCD countries held only 33% and 1% respectively.

CHAPTER 6. OIC MEMBER COUNTRİES MERCHANDISE EXPORT

6.1 Volume and growth

The analysis of the past five years of the OIC Member Countries' merchandise exports indicates that the value of the merchandise exports reached about 2.5 trillion but decreased -12.7% in 2024, compared to the previous year (2023). This was also the end of the upward trend seen in its export volume during 2021 and 2022.

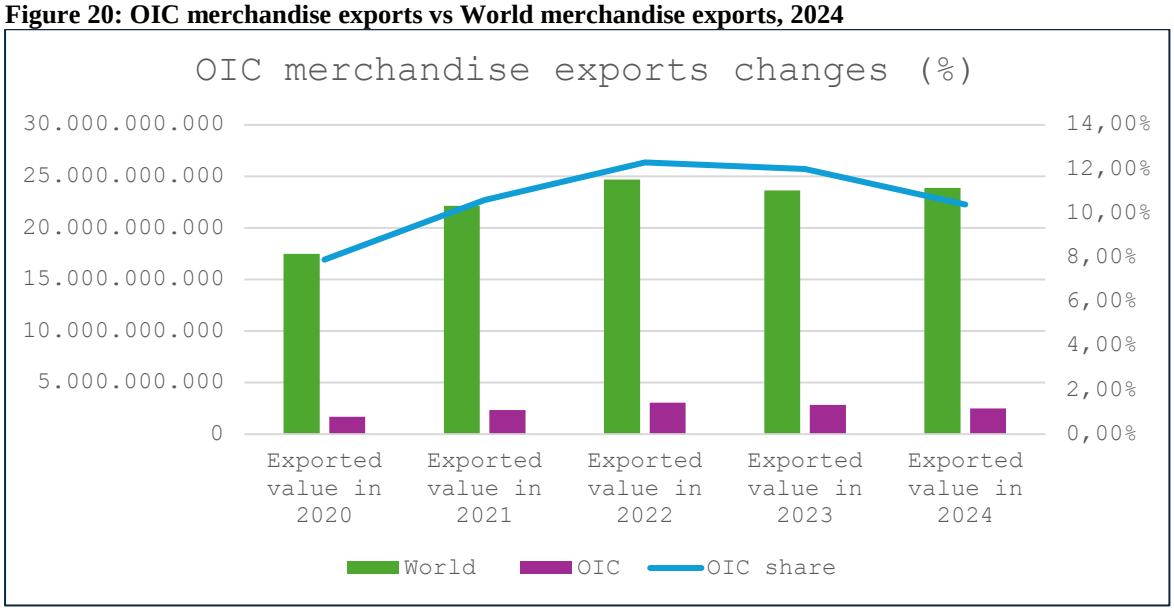

Table 27: OIC merchandise exports, 2020-2024, USD in thousands

Exporters	Exported value in 2020	Exported value in 2021	Exported value in 2022	Exported value in 2023	Exported value in 2024
World	17,494,444,311	22,148,344,040	24,701,959,316	23,633,258,628	23,899,979,068
OIC Member Countries	1,689,503,704	2,354,082,811	3,050,192,018	2,847,954,356	2,487,297,562
Share of the OIC exports in Global Merchandise exports (%)	7.9%	10.6%	12.3%	12%	10.4%

Source: ITC database

The same dataset illustrates that the share of the OIC merchandise exports in the global merchandise exports was only 10.4% in 2024. Compared to the previous year's share (2023), this represented around 2% decrease. As the Figure below shows, this share in percentage and in the volume of export value started decreasing during the past five years, starting from 2022.

Figure 20: OIC merchandise exports vs World merchandise exports, 2024

Source: ITC database

At the same time, the merchandise exports by the OIC Member Countries during the past five years were not stable and their upward trend ended in 2022. In fact, the value of the OIC merchandise export dropped to -6.6 in 2023 and then continued to decrease in 2024. The drop in 2024 was almost the double of the previous year (2023), stood at -12.7.

Table 28: Annual changes of OIC merchandise exports,2020-2024

Exporters	Exported value in 2020	Exported value in 2021	Exported value in 2022	Exported value in 2023	Exported value in 2024
OIC Member Countries	1,689,503,704	2,354,082,811	3,050,192,018	2,847,954,356	2,487,297,562
Annual Changes in OIC exports (%)		39.3	29.5	-6.6	-12.7

Source: ITC database

6.2 Major merchandise exporters

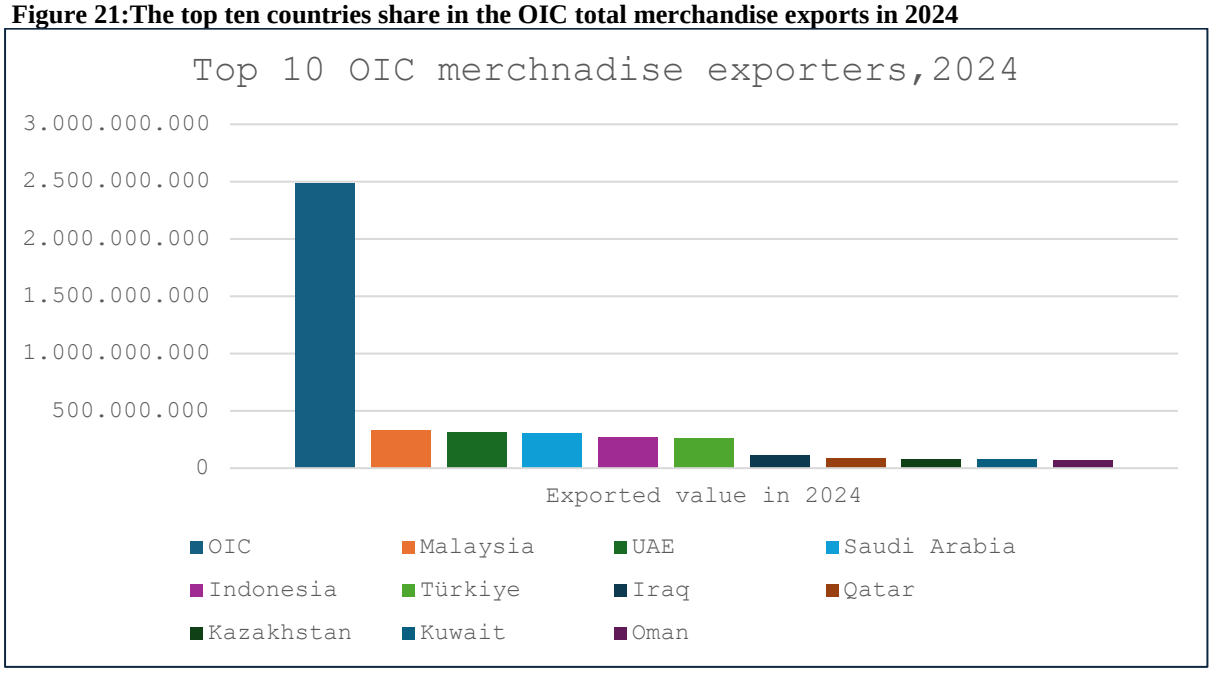

As table no.29 and Figure no.20 indicate the top merchandise exporters of the OIC during the past five years. As the ITC database shows Malaysia with USD 330 billion was the leading country among the OIC 57 member countries and Malaysia shared the top three rank with UAE and Saudi Arabia. These three countries are followed by Indonesia and Türkiye. These top five (5) merchandise exporters constituted 59% of the entire OIC Member Countries merchandise exports in 2024. In this context, it is worthy to note that one or two items was the principal exported merchandise of these top five countries (e.g. natural gas or crude or palm oil), except Türkiye.

Table 29:Top 10 OIC Member Countries merchandise exports ,2020-2024

Exporters	Exported value in 2020	Exported value in 2021	Exported value in 2022	Exported value in 2023	Exported value in 2024
OIC	**1,689,503,704**	**2,354,082,811**	**3,050,192,018**	**2,847,954,356**	**2,487,297,562**

Figure 21:The top ten countries share in the OIC total merchandise exports in 2024

Source: ITC database

6.3 OIC export partner countries

China was the leading importers of the OIC Member Countries' originated merchandise during the past five years and followed by India, USA, Japan, ROK, Singapore, Italy, Germany, France and Netherlands. Interestingly, these top 10 countries' merchandise imports from the OIC Member Countries were more than half of the entire OIC merchandise exports in 2024 (52.7% or USD 1,312,339,818).

Furthermore, most of the top 10 OIC importers' import value in 2024 increased compared to the previous year (2023). As the table below illustrates, China and Japan increased their merchandise imports from the OIC Member Countries about USD 30 billion and USD 32 billion in 2024 respectively.

Table 30: Major importers of the OIC merchandise, USD in thousands

Importers	OIC Exported value in 2020	OIC Exported value in 2021	OIC Exported value in 2022	OIC Exported value in 2023	OIC Exported value in 2024
OIC merchandise export value	**1,689,503,704**	**2,354,082,811**	**3,050,192,018**	**2,847,954,356**	**2,487,297,562**

Although UAE, Türkiye, and Saudi Arabia were the first 5 OIC Member Countries enter the 30 major importers of OIC merchandise list during the past five (5) years with the rank between 14 and 25, their value of the imports significantly decreased in 2024, compared to the previous year (2023).

Figure 22: OIC merchandise imports by top 5 OIC importers, 2023-2024

Source: ITC database

6.4 Major products exported by OIC Member Countries.

The table below indicates that the top or mostly exported 5 product groups were "Mineral fuels, mineral oils and products of their distillation; bituminous substances"," Electrical machinery and equipment and parts thereof; sound recorders and reproducers, television"," Natural or cultured pearls, precious or semi-precious stones, precious metals, metals clad ", Nuclear reactors, boilers, machinery and mechanical appliances; parts thereof" and "Plastics and articles thereof" during the past five years.

Among these product groups, mineral fuels, mineral oils and products of their distillation under the HS chapter 27 with its export value of USD 1trillion or about 44% of the whole merchandise exports of the OIC Member Countries was the leading service category of 2024. This product category was followed by other two main merchandise groups: Electrical machinery and equipment (HS chapter 85) and natural or cultured pearls, precious or semi-precious stones (HS Chapter 71) with their respective share of 7.5 % and 5.8% of the entire OIC merchandise exports in 2024.

Finally, the merchandise-based data set shows that the share of the exports of the top five major products categories in the OIC's total merchandise exports in 2024 was 63%.

Table 31: Main product categories exported by OIC Member Countries,2020-2024, USD in thousands.

HS Code	Product label	Exported value in 2020	Exported value in 2021	Exported value in 2022	Exported value in 2023	Exported value in 2024

CHAPTER 7. OIC MEMBER COUNTRİES MERCHANDISE IMPORT

7.1 Imports volume and growth

The value of the OIC merchandise imports has been between USD 1.6 trillion and USD 2.5 trillion between 2020 and 2025. Although its value reached the highest points of the past five years (approximately USD 2.6 trillion in 2023), it ended with USD 2.4 trillion in 2024.

10 https://www.trademap.org/Product_SelCountry_TS.aspx?nvpm=1%7c%7c6%7c%7c%7cTOTAL%7c%7c%7c2%7c1%7c2%7c2%7c2%7c1%7c1%7c1%7c1%7c1%7c1 accessed 04102024

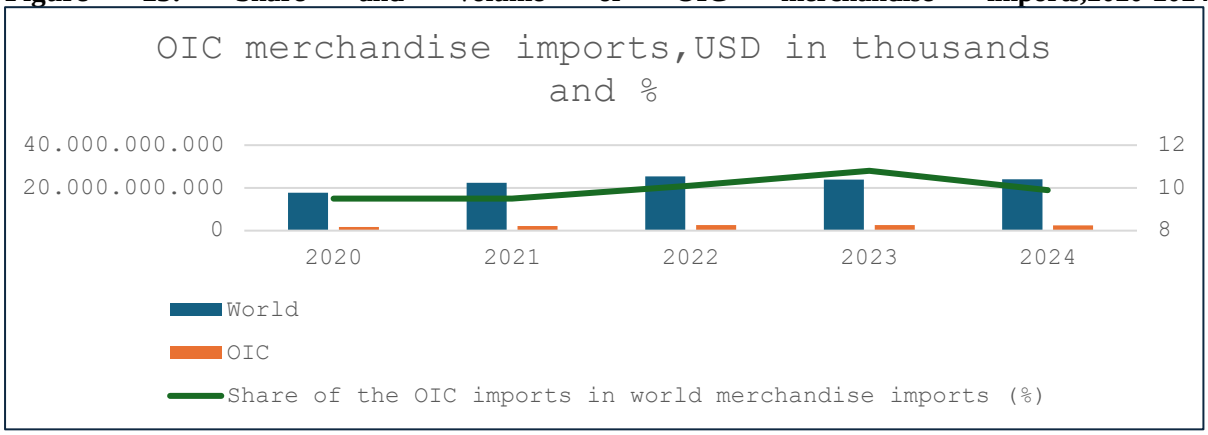

Table 32: OIC merchandise imports, 2019-2023, USD in thousands

Importers	Imported value in 2020	Imported value in 2021	Imported value in 2022	Imported value in 2023	Imported value in 2024
World	17,727,610,451	22,450,819,760	25,322,777,860	23,946,292,315	24,090,360,830

7.2 Major OIC merchandise importers

The OIC merchandise imports-based dataset indicates that the top 10 major OIC merchandise importers were led by Türkiye with USD 344 billion and -as shown below- followed by UAE, Malaysia, Indonesia, Saudi Arabia, Egypt, Bangladesh, Morocco, Kazakhstan, and Pakistan. The total value of the top ten countries' merchandise imports in 2024 totaled to USD 1.7 trillion which represent about 73% of the entire OIC merchandise imports of the same year.

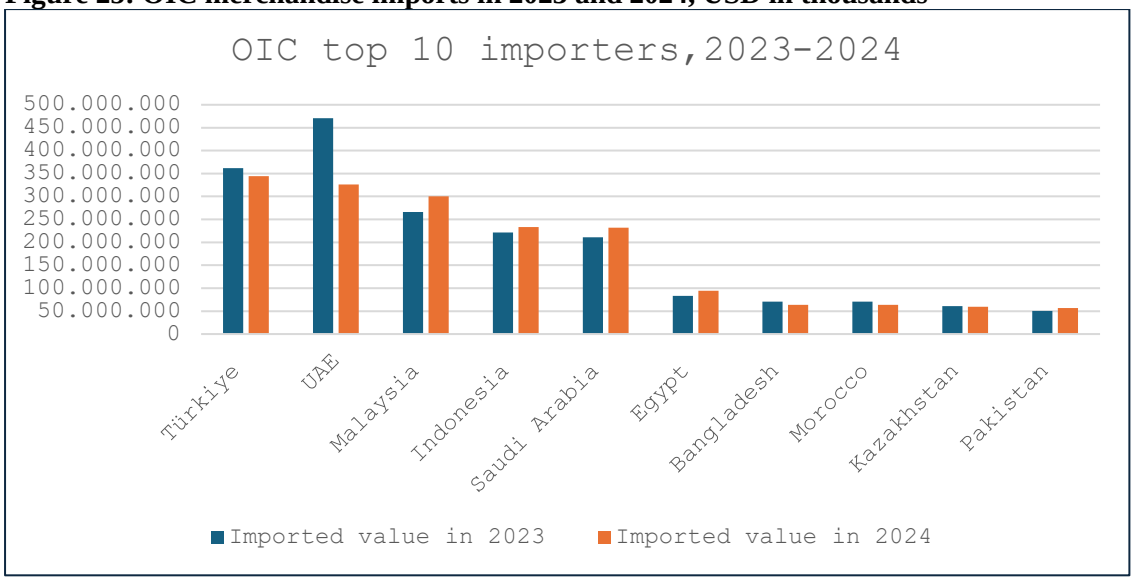

Table 34: Top OIC merchandise importers, 2020-2024, USD in thousands

Importers	Imported value in 2020	Imported value in 2021	Imported value in 2022	Imported value in 2023	Imported value in 2024

Source: ITC database

The same dataset also shows that the value of merchandise imports by Türkiye, UAE, Bangladesh, and Kazakhstan was very slightly decreased in 2024, compared to the previous year (2023).

Figure 25: OIC merchandise imports in 2023 and 2024, USD in thousands

Source: ITC database

7.3 OIC import partner countries

The major or top 10 merchandise suppliers of the OIC merchandise imports in 2024 were China, USA, Russian Federation, Germany, Saudi Arabia, Singapore, Japan, Italy and Türkiye. The share of the leading merchandise supplier country (China)'s share in the entire OIC merchandise imports in 2024 were about 22% and its exports to the OIC Member Countries continuously increased year by year during 2020-2024.

Table 35:The top exporters of the OIC merchandise imports, 2020-2024, USD in thousands

Exporters	Imported value in 2020	Imported value in 2021	Imported value in 2022	Imported value in 2023	Imported value in 2024
China	312,830,232	396,932,026	466,889,080	493,694,707	532,764,085

7.4 Major imported products groups

In 2024, the top product category imported by the OIC Member Countries was mineral fuels, mineral oils, and products of their distillation located under chapter 27 of the Customs Harmonization system. This group was followed by machinery and mechanical equipment (HS chapter 85), electrical machinery and equipment (HS chapter 84), vehicles other than railway or tramway rolling stock, and parts and accessories (HS chapter 87), and natural or cultured pearls and precious or semi-precious stones (HS chapter 1). The value of the top 5 product categories of the year 2024 constituted almost 50% of the entire product imports of the OIC Member Countries.

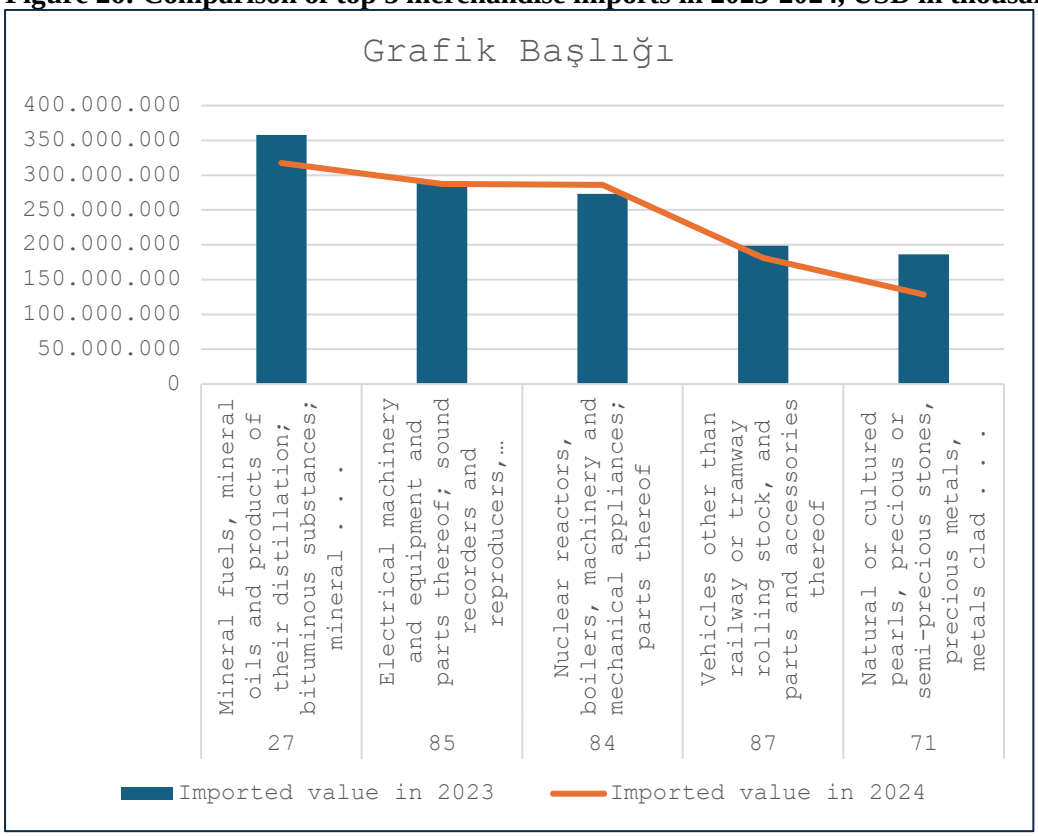

Table 36: Major products groups imported by OIC Member Countries, 2020-2024, USD in thousands

Code	Product label	Imported value in 2020	Imported value in 2021	Imported value in 2022	Imported value in 2023	Imported value in 2024
TOTAL	All products	1,687,339,661	2,139,120,835	2,569,242,056	2,597,441,886	2,402,651,970
27	Mineral fuels, mineral oils and products of their distillation; bituminous substances; mineral . . .	189,476,499	278,107,295	416,495,769	357,848,186	317,494,295
85	Electrical machinery and equipment and parts thereof; sound recorders and reproducers, television . . .	204,570,504	244,247,942	272,230,020	291,399,413	287,349,035

CHAPTER 8. OIC MEMBER COUNTRİES SERVICE EXPORT

8.1 Volume and growth

Thethe HS database indicates that the 57 OIC Member Countries'service exports totalled USD 695 billion and represented about 7.8% of the global service export in 2024. The past five years value shows that this share have been always positive and upward trends starting from 2020.

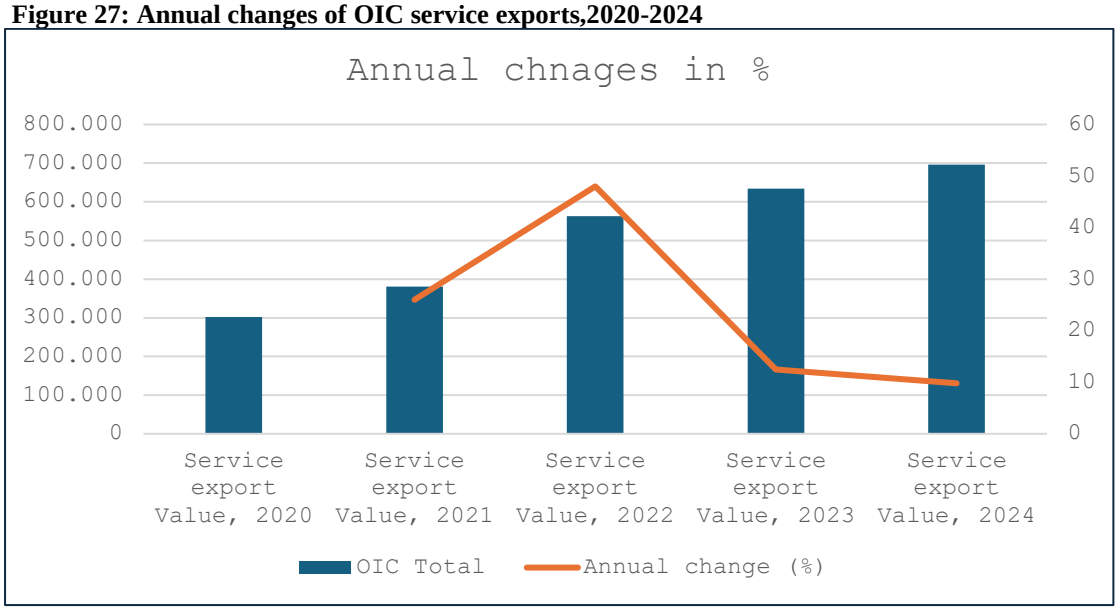

Table 37: Service exports by the OIC Member Countries,2020-2024, USD in millions

World and OIC Member Countries	Service export Value, 2020	Service export Value, 2021	Service export Value, 2022	Service export Value, 2023	Service export Value, 2024
World	5,321,449	6,407,102	7,422,500	8,056,096	8,852,172
OIC Total	301,880	380,480	563,220	633,962	695,858
OIC share in world service export (%)	5.7	5.9	7.5	7.8	7.8

Source. UNCTAD database

As the Figure below illustrate, the OIC service exports during the past five years were not negative figures but it did not retain the upward trend during the past two years (2023 and 2024).The yearly basis changes were 26% in 2021,48% in 2021, 12.5% in 2023 and 9.8% in 2024.

Figure 27: Annual changes of OIC service exports,2020-2024

Source:UNCTAD database

8.2 Major OIC service exporters

The OIC service exports related dataset indicates that UAE was the leading country among the OIC Member Countries in service exports and UAE was followed by other top 9 OIC Member Countries:Türkiye;Saudi Arabia,Malaysia,Indonesia,Qatar,Egypt,Morocco,Bahrain,Iran I.R .

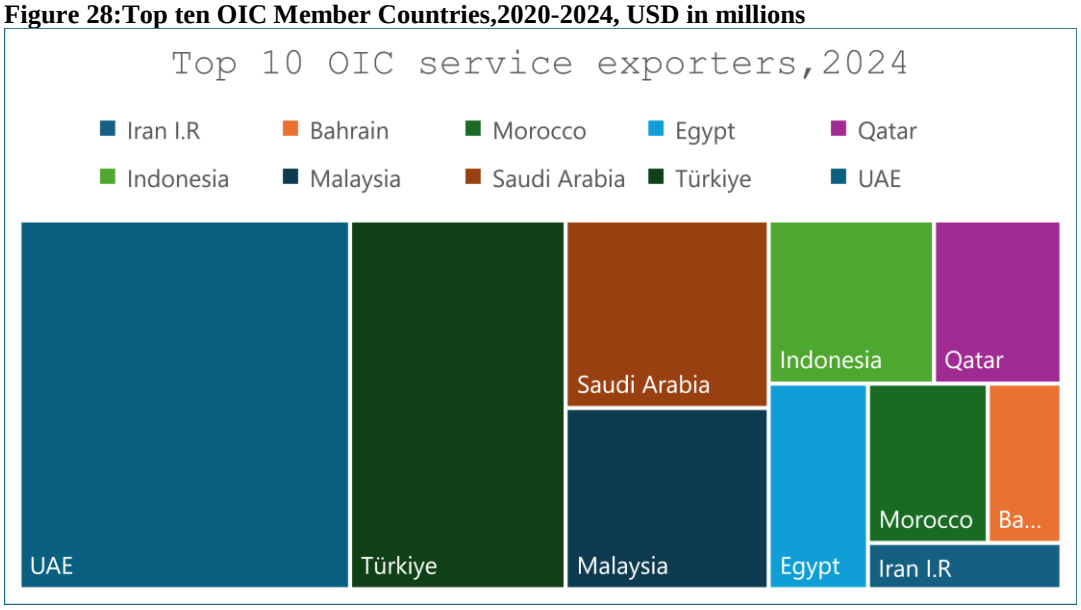

Table 38: OIC Top ten serviec exporter countries,2020-2024, USD in millions

Based on the above statistics, these top ten OIC service exporters are also illustatred in a treemap style Figure below.

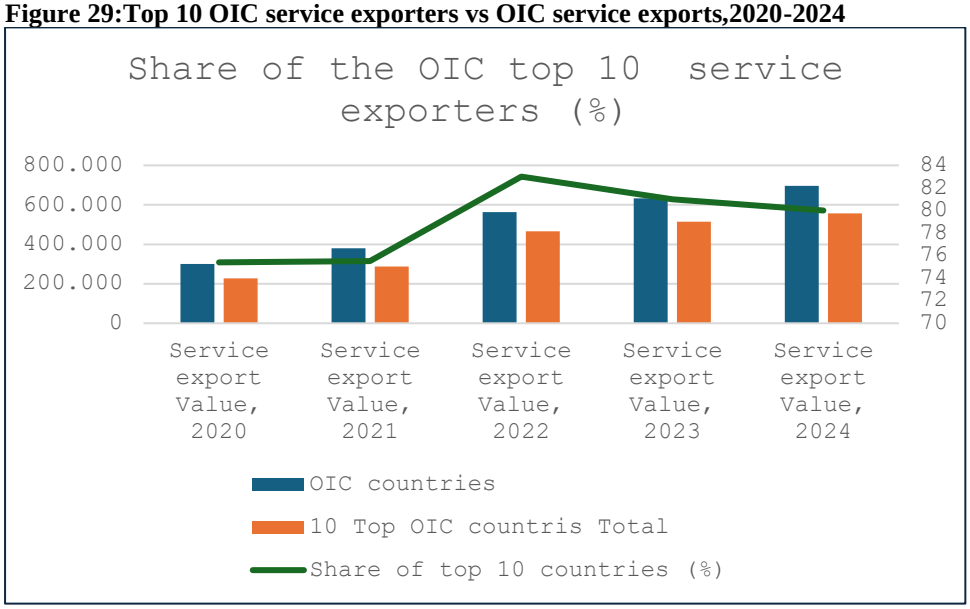

Figure 28:Top ten OIC Member Countries,2020-2024, USD in millions

Source.WTO database

The share of the UAE' service exports in the entire OIC service exports was 25% while the top 10 OIC service exporter countries'share constitutied about 80% of the entire OIC service exports.

Figure 29:Top 10 OIC service exporters vs OIC service exports,2020-2024

Source: WTO database

8.3 Type of service exported

Based on the WTO database,the top 3 service groups exported by the OIC Member Countries during the past five years,including 2024 were "travel", "other commercial services", and"transport". Among the transport category, air transport, as a sub category of tarnsport service, had the majority with USD 117 billion or 65% of te entire transport service export. On the other hand, As the table below shows that the firts top service categories constituted no less than 96% of the entire OIC commercail service exports during thepast five years.

Table 39:Top 5 service category exported by OIC Member Countries,2020-2024, USD millions

	2020	2021	2022	2023	2024

Source: WTO database

CHAPTER 9. OIC MEMBER COUNTRİES SERVICE IMPORT

9.1 Volume and Growth

The international dataset by UNCTAD indicates that the OIC service imports during the past five years has been between USD 442 billion and USD 705 billion and it has always been in upward trend during 2020-2024. The highest annual service import value occured in 2024 with USD 705 billion.

Table 40: OIC service imports,2020-2024, USD in millions

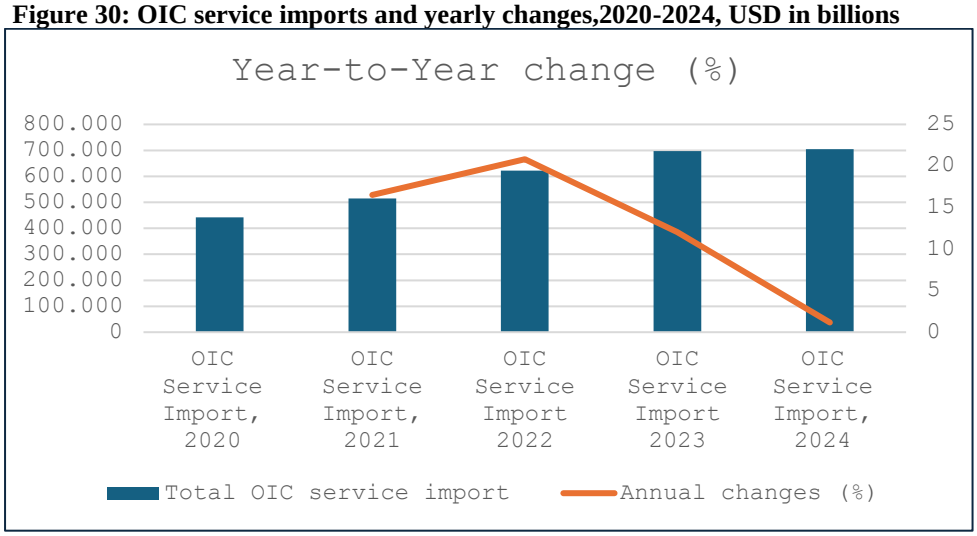

Economy	OIC Service Import, 2020	OIC Service Import, 2021	OIC Service Import 2022	OIC Service Import 2023	OIC Service Import, 2024
World	5,058,627	5,859,878	6,798,150	7,478,990	8,078,610
Total OIC service import	441,794	514,703	621,858	696,867	705,037
OIC service share in world service imports (%)	8.7	8.7	9.1	9.3	8.7

Source: UNCTAD database

According to the same dataset, the share of the OIC service imports during the past five years has been between 8.7% and 9.3% only. Compared to the pervios year (2023), this share decreased 9.3% in 2023 to 8.7% in 2024.

Furthermore, the value of the OIC service imports increased year to year during the past five years but the rate of the annual increase decreased or went downward direction, and dropped1.17% in 2024 compared to 2023.

Figure 30: OIC service imports and yearly changes,2020-2024, USD in billions

Source: UNCTAD database

9.2 Major OIC service importers

The OIC top 10 major service importers during the past five years (2020-2024) were UEA,Saudi Arabia,Indonesia,Malaysia,Türkiye,Qatar,Kuwait,Egypt,Iraq and Iran (Islamic Republic of). The total value of the top ten OIC Member Countries' service imports was about USD 516 billion. Among these countries, compared to the previous year (2023), UAE, Qatar and Kuwait's service imports slightly decreases (between USD 2 billion and USD 4 billion) while the remaining (7) countries' service import value increase between USD 4 billion and USD 6 billion.

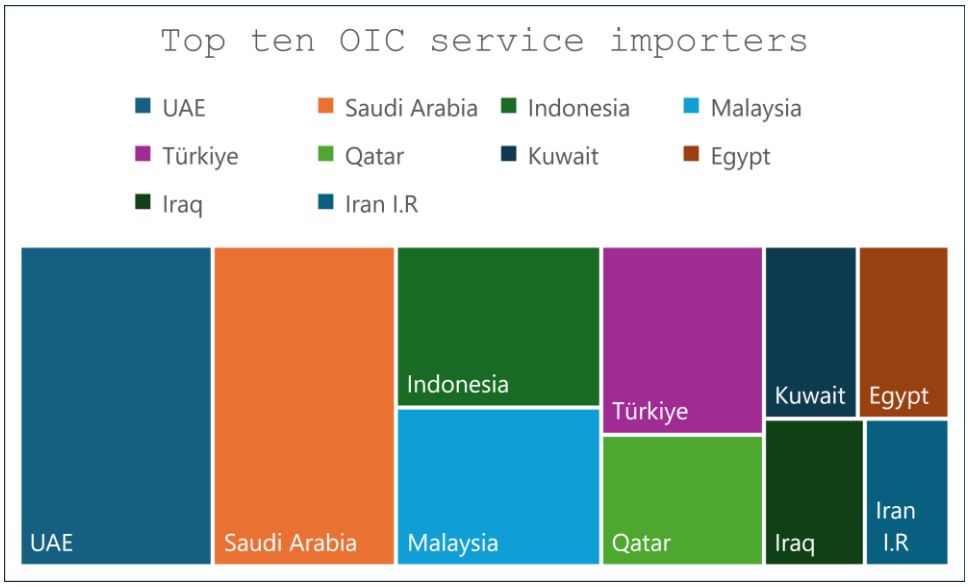

Table 41: OIC service importers,2020-2024, USD in millions

Top10 OIC service importers	2020	2021	2022	2023	2024
UAE	61,865	76,106	96,917	109,600	107,179
Saudi Arabia	56,264	73,781	82,449	97,914	101,665
Indonesia	24,771	28,550	43,165	51,283	57,512

CHAPTER 10. INTRA-OIC MERCAHANDISE EXPORTS

10.1 Volume and growth

The statistics on the OIC-Intra merchandise trade show that the value of the intra-OIC merchandise trade was upward until 2023, but this momentum was lost in 2024. The USD 576 billion of 2023 decreased to USD 403 billion in 2024.

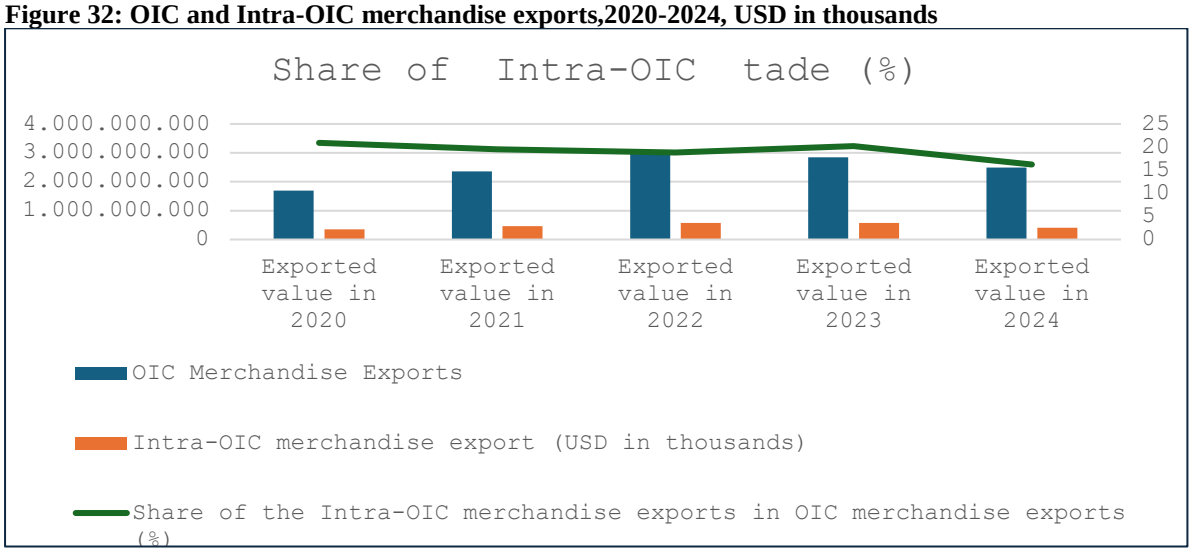

Table 43:OIC and Intra-OIC merchandise exports,2020-2024, USD in thousands

Exporters	Exported value in 2020	Exported value in 2021	Exported value in 2022	Exported value in 2023	Exported value in 2024
OIC Merchandise Exports	1,689,503,704	2,354,082,811	3,050,192,018	2,847,954,356	2,487,297,562
Intra-OIC merchandise export (USD in thousands)	353,322,806	459,337,785	574,034,190	576,007,536	403,661,828
Share of the Intra-OIC merchandise exports in OIC merchandise exports	21.9	19.5	18.8	20.2	16.2
Year-to-Year change in Intra-OIC merchandise exports		30	24.9	0.34	-29.9

Source: ITC database

The share of the intra-OIC merchandise exports in the OIC merchandise exports has not exceeded even 25% during the past five years. The share has been between 16.2% (2024) and 21.9% (2020).

Figure 32: OIC and Intra-OIC merchandise exports,2020-2024, USD in thousands

Source: ITC database

10.2 Major intra-OIC merchandise exporters

The major top 10 intra-OIC merchandise exporters were Saudi Arabia, Türkiye, UAE, Indonesia, Malaysia, Egypt, Kazakhstan, Oman, Pakistan and Nigeria. Saudia Arabia with USD 82.6 billion export value and 20% share in the total intra-OIC merchandise exports was leading country among not only top 10 OIC Member Countries but also 57 OIC Member Countries. At the same time, the total value of these top 10 countries intra-export merchandise exports constitutes slightly over 80% of the entire intra-OIC merchandise export value of 2024.

Table 44:Top 10 Intra-OIC merchandise exporters,2020-2024, USD in thousands

Exporters	Exported value in 2020	Exported value in 2021	Exported value in 2022	Exported value in 2023	Exported value in 2024

10.3 Mostly exported intra-OIC merchandise

The following table lists the mostly intra-OIC exported five products groups of the past three years among the total 99 HS product categories. These top five merchandise categories were led by “Mineral fuels, mineral oils under HS chapter 27”, and followed by “Natural or cultured pearls, precious or semi-precious stones,” “Plastics and articles thereof “, “Electrical machinery and equipment “, and “Animal, vegetable or microbial fats and oils and their cleavage products under the HS chapters of 71,39,85 and 15.

In 2024, the share of the leading product category (Mineral fuels, mineral oils under HS chapter 27) within the total intra-OIC merchandise exports was about 28% while these top five product categories’ share within the entire intra-OIC merchandise export was exactly 50%.

Table 45: Mostly intra-OIC exported product categories,2020-2024, USD in thousands

Product code	Product label	Organization of the Islamic Cooperation (OIC)'s exports to Organization of the Islamic Cooperation (OIC)		
		Value in 2022	Value in 2023	Value in 2024

CHAPTER 11. INTRA – OIC MERCHANDISE IMPORTS

11.1 Volume and growth

The ITC database indicates that the total intra-OIC merchandise imports were about USD 411 billion in 2024 which is USD 139 billion less than the previous year's intra-OIC import value. More interestingly, the same data set shows that the upward trend starting from 2020 is sharply ended in 2023 and decrease started with -0.3% and then deepen to -25% in 2024.

Table 46: Intra-OIC merchandise import data,2020-2024, USD in thousands

Importers	Imported value in 2020	Imported value in 2021	Imported value in 2022	Imported value in 2023	Imported value in 2024
Organization of the Islamic Cooperation (OIC) Aggregation	337,291,608	438,988,521	551,832,569	550,199,229	411,195,539
Year-to-Year change (%)		30	26	-0.3	-25

Source: ITC database

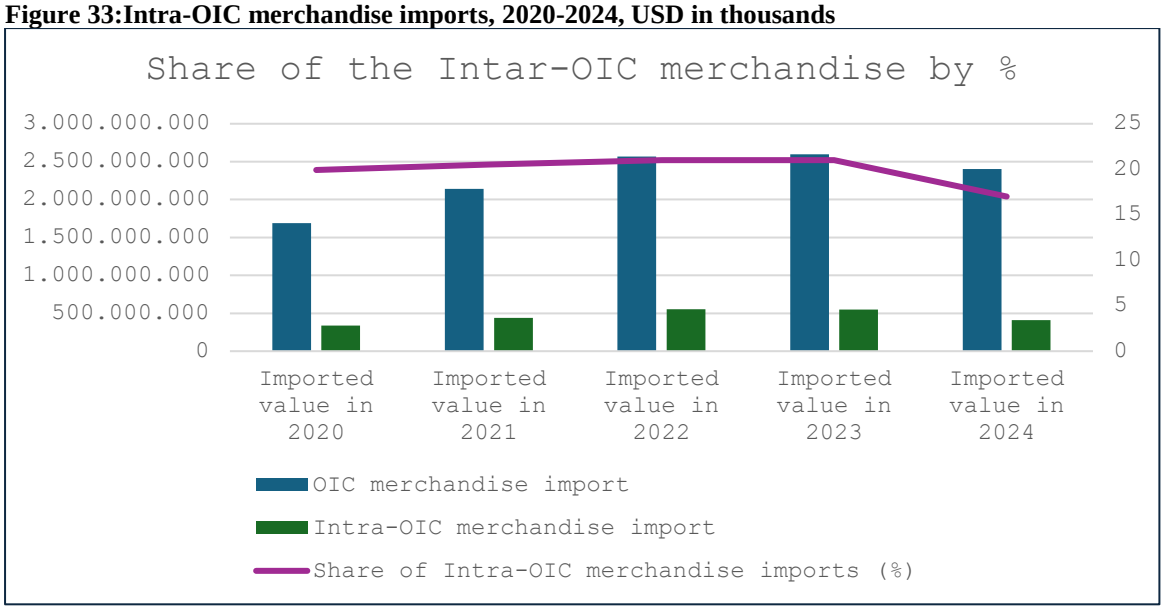

The analysis of OIC merchandise imports with the Intra-OIC merchandise imports indicates that the share of the Intra-OIC imports of 57 OIC member states has been between 17% to 21% during 2020-2024.

Table 47:OIC and intra-OIC merchandise imports,2020-2024, USD in thousands

11.2 Major intra-OIC merchandise importers

As the following table indicates, the ten major intra-OIC merchandise importers during the past five years, including 2024 were UAE, Türkiye, Saudi Arabia, Malaysia, Indonesia, Pakistan, Egypt Iraq, Uzbekistan and Bahrain. Their total merchandise imports from the other OIC Member Countries totaled to USD 284 billion in 2024, which represents about 69% of the entire intra-OIC merchandise imports of 57 countries.

Table 48: Top ten intra-OIC merchandise importers,2020-2024, USD in thousands

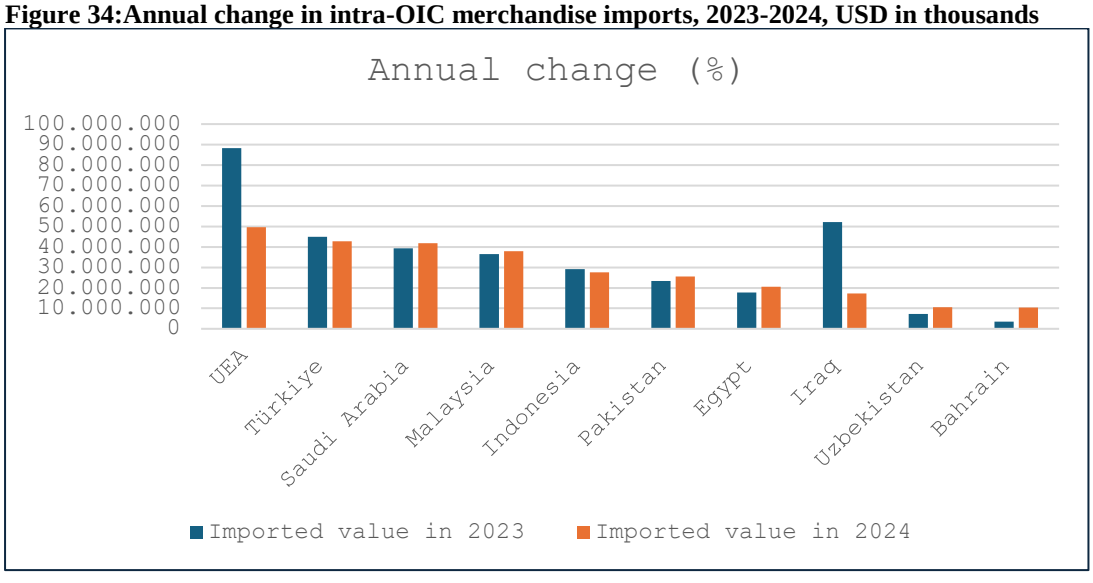

Importers	Import value in 2020	Imported value in 2021	Imported value in 2022	Imported value in 2023	Imported value in 2024

Source: SESRIC database

At the same time, the dataset shows that the leading intra-OIC importer country, UEA, decreased its imports from the OIC Member Countries in 2024, compared to the previous year (2023). It was USD 88 billion in 2023 and dropped to 49 billion in 2024. A similar but significant drop during the same period was noted in the Iraq's imports from the other OIC Member Countries. Iraq's intra-OIC merchandise imports decreased from USD 52 billion in 2023 to USD 17 billion in 2024.

The biggest increase was observed in the Bahrain's intra-OIC merchandise import during the last two years, jumped from USD 3,5 billion in 2023 to 10.4 billion in 2024.Uzbekistan was the second OIC country followed the same practice with a total of USD 3.2 billion.

Figure 34:Annual change in intra-OIC merchandise imports, 2023-2024, USD in thousands

11.3. Mostly imported intra-OIC merchandise

The following list for the past three years (2022,2023,2024) illustrates the top five (5) product groups which were subject to the intra-OIC merchandise imports among the OIC 57 member States. According to this dataset, the products under the HS[11] chapter 27 titled "Mineral fuels, mineral oils and products of their distillation; bituminous substances" with USD 121 billion was the mostly traded product category during the past five years, including 2024. This product category represented about 30% of the entireThis product category was followed by **"**Natural or cultured pearls, precious or semi-precious stones, precious metals" with USD 31 billion, **"**Plastics and articles thereof" with USD 20 billion, "Electrical machinery and equipment and parts" with USD 18.6 billion, and finally "Animal, vegetable or microbial fats and oils and their cleavage products; prepared edible fats" with USD 16.9 billion."

Table 49: Mostly imported merchandise in intra-OIC trade,2022-2024, USD in thousands

Product code	Product label	Organization of the Islamic Cooperation (OIC)'s imports from Organization of the Islamic Cooperation (OIC)

[11] The Harmonized System (HS) is an international nomenclature defined by the World Customs Organisation (WCO) for the classification of products. It allows participating countries to classify traded goods on a common basis for customs purposes. At the international level, the Harmonized System for classifying goods is a six-digit code system.The HS comprises approximately 5,000 article/product descriptions that appear as headings and subheadings, arranged in 96 chapters (plus three special chapters).

CHAPTER 12. STATE OF PALESTINE

12.1 Economic and Trade Overview

According to one of the World Bank publications (Report No: ACS22471), the Palestinian economy is severely hampered by trade-related restrictions, high logistics costs, cumbersome procedures and institutional inefficiencies. Operating within an uneven Customs Union arrangement with Israel, the Palestinian economy has accumulated an enormous trade deficit and overdependence on Israel's economy and has neither been able to develop dynamic export-oriented sectors nor to tap into larger and more competitive third markets. Over the years, this situation has contributed to slow growth, high unemployment, and stubborn persistence of poverty in the Palestinian economy.[12,13]

The same publication also highlights that "The Palestinian economy is failing to provide rising living standards and sufficient jobs adequately and sustainably for its people and has not established a sound financial base for the provision of public services and for the purchase of essential imports from abroad. The Palestinian economy's exports of goods and nonfactor services as a share of GDP are less than half those of a comparable group of countries, and its trade deficit as a share of GDP is more than double those of comparable countries; it is one of the highest, or the highest, in the world."

Due to lack or limited of data on Palestine's export and imports of merchandise and service, particularly for the year 2024, the analysis over Palestine's trade, as of September 2025, remained limited.

12.2 Palestine's merchandise imports

12.2.1 Volume and growth

The available international and national datasets indicates that the value of the Palestine's merchandise imports was USD 6.3 billion only. The year-to-year basis analysis shows that the value of the merchandise imports' decrease started in 2023 by -9% after the 16% increase seen in 2022. The decrease in merchandise import value continued in 2024 with a significant drop (-23%) or USD191million.

Table 50:Palestine's merchandise import,2021-2024, USD in thousand

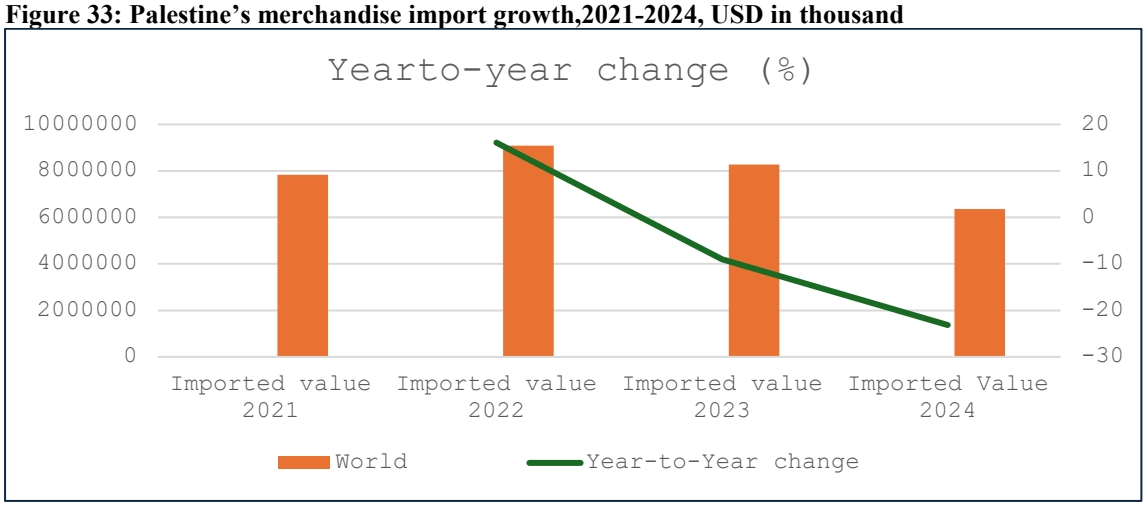

Exporters	Imported value 2021	Imported value 2022	Imported value 2023	Imported Value 2024

12.2.2 Major importing partners

As shown below, Israel was the major merchandise importing partner of the Palestine and this partner's share within the entire Palestine's merchandise import has been always more than 50% of the entire merchandise imports of Palestine during the past five years. The data of the indicates that Israel was followed by China, Türkiye, Jordan, Germany, Switzerland, Egypt, India, Italy, and Saudi Arabia as the other major merchandise supplier countries of Palestine.

Table 51:Palestine's top 10 merchandise import partners,2021-2024, USD in thousand

Exporters	Imported value in 2021	Imported value in 2022	Imported value in 2023	Imported value in 2024

12.2.3 Major imported product categories

The ITC datasets shows that the top five product groups imported by Palestine during 2020-2024 were “Iron and steel”,” Preparations of cereals, flour, starch or milk; pastrycooks' products”,” Sugars and sugar confectionery” and “boilers, machinery and mechanical appliances; parts thereof” under the HS chapter numbers of 72,19,17, 84 and 87 respectively. Among these product categories, iron and steel with USD 123 million value was the mostly imported product category by Palestine in 2024.

Table 52:Major imported product categories,202-2024, USD in thousands

Code	Product label	Imported value in 2020	Imported value in 2021	Imported value in 2022	Imported value in 2023	Imported value in 2024[17]
TOTAL	All products	6,063,062	7,829,705	9,088,634	8,270,534	6,356,300
72	Iron and steel	206,969	298,455	346,267	290,843	123,741
19	Preparations for cereals, flour, starch or milk;	156,119	177,641	202,996	222,663	119,740
17	Sugar and sugar confectionery	77,156	81,613	95,143	104,137	110,336
84	Nuclear reactors, boilers, machinery and mechanical appliances; parts thereof	252,680	317,965	352,799	327,565	95,938
87	Vehicles and their parts and accessories thereof	225,740	387,147	405,635	436,941	88,030

Source: ITC database, Palestinian Central Bureau of Statistics 2025 [18] and trading economics.[19]

The products groups illustrated is in line with the trading economics’ findings of “Palestine mainly imports oil, food, vegetables, machinery, metals, vehicles, chemicals, livestock, beverages and salt.[20]

12.3 Merchandise export

12.3.1 Volume and growth

The annual value of the exports of merchandise by Palestine during 2021-2024 was averagely USD 1,5 billion. The year-to-year change shows that the export value was not stable, increases 12.3% in 2022 but decreased -0.2% in 2023 and then increased about 1.1% in 2024.

Table 53: Palestine merchandise exports,2021-2024, USD in thousands

Importers	2021	2022	2023	2024
World	1,357,640	1,525,160	1,521,388	1,538,400

12.3.2 Major exporting partners

The top ten Palestine's merchandise importers during 2021-2024 were Israel, Jordan, UEA, Türkiye, USA, Saudi Arabia, UK, Kuwait, Germany, and Qatar. Among these exporting partner countries, Isreal's share with USD 1.3 billion was above 85% during 2024.

Table 54: Palestine's major export partners,2021-2024

Importers	Exported value in 2021	Exported value in 2022	Exported value in 2023	Exported value in 2024

Others				211,400

Source: ITC database, Palestinian Central Bureau of Statistics 2025 [22]

12.3.3 Mostly exported products

Based on the available data, the top five major products exported by Palestine during the past three years, including 2024 were "Edible fruit and nuts; peel of citrus fruit or melons, "Animal, vegetable or microbial fats and oils and their cleavage products; prepared edible fats"," Coffee, tea, maté and spices"," Preparations of vegetables, fruit, nuts or other parts of plants" and "Aluminum and articles thereof ".

As the table below shows, among these groups, the exports of edible fruit and nuts; peel of citrus fruit or melons with the value of USD 63 million was the leading product category under the HS chapter 08 in 2023 and 2024 while "Aluminum and articles thereof" under the HS chapter 76 was leading product group of 2022.

[22] https://www.pcbs.gov.ps/statisticsIndicatorsTables.aspx?lang=en&table_id=4297

Table 55: Palestine's major exported products,2022-2024, USD in thousands

Code	Product label	Exported value in 2022	Exported value in 2023	Exported value in 2024
TOTAL	All products	1,525,160	1,521,388	97,611
08	Edible fruit and nuts; peel of citrus fruit or melons	55,846	74,909	63,130
15	Animal, vegetable or microbial fats and oils and their cleavage products; prepared edible fats; . . .	51,215	46,146	12,119

20	Preparations of vegetables, fruit, nuts or other parts of plants	16,828	18,210	2,084
76	Aluminum and articles thereof	63,093	56,922	2,023

Source: ITC database

12.4 Palestine service export and import

Palestine's service export in 2024 was USD 514 million but USD 376 million less than the previous year (2023)2 service exports. The increase in the value of service exports during 2020 and 2021 and 2022 turned into negative values in 2023 (-3%) and (-42%) in 2024.

The similar analysis for the Palestine's service imports shows that the service import value of 2024 was almost double of the service export value of the same year. However, this import value was almost USD 602 million less than the imports made in 2023. Additionally, the increase in service imports during 2020-2022 turned into a downward trend in 2023 and 2024 with -5% and -30% respectively.

Table 56:Palestine service exports and imports,2020-2024, USD in thousands

Importer	Palestine Service Export 2020	Palestine Service Export 2021	Palestine Service Export 2022	Palestine Service Export 2023	Palestine Service Export 2024

Source: ITC database

12.4.1 Type of service exported and imported

The ICT database indicates that the major service groups exported by Palestine during the past five years has been "construction" and followed by other nine service groups: "Travel", "Telecommunications, computer, and information services", "Government goods and services", "Other business services" and "Transport"," Maintenance and repair services.
"," Charges for the use of intellectual property" and "Insurance and pension services". The share of the top three service groups constituted almost 72% of the entire service exports by the country.

Table 57: Type of services exported by Palestine,2020-2024, USD in thousands

Code	Service label	Exported Value in 2020	Exported Value in 2021	Exported Value in 2022	Exported Value in 2023	Exported Value in 2024
S	All services	670,102	851,731	922,363	890,320	514,284
5	Construction	104,565	125,122	122,429	258,126	199,058
4	Travel	464,740	614,525	677,436	400,211	131,963
9	Telecommunications, computers, and information	35,853	39,248	53,993	109,442	91,019
12	Government goods and services	23,453	30,098	22,973	47,821	39,674

6	Insurance and pension services	274	-	118	-	-

Source: ITC database

The analysis of the service groups imported by Palestine during the same period shows that Transport, Travel and Other business services were the top 3 service categories by Palestine as shown below. The major service category, transport, with USD 515 million or 37% of the total service imports by Palestine in 2024 alone. The values of the second and third major service categories of 2024 (Travel and Other business services) were approximately half of the total value of the leading service category (Transport).

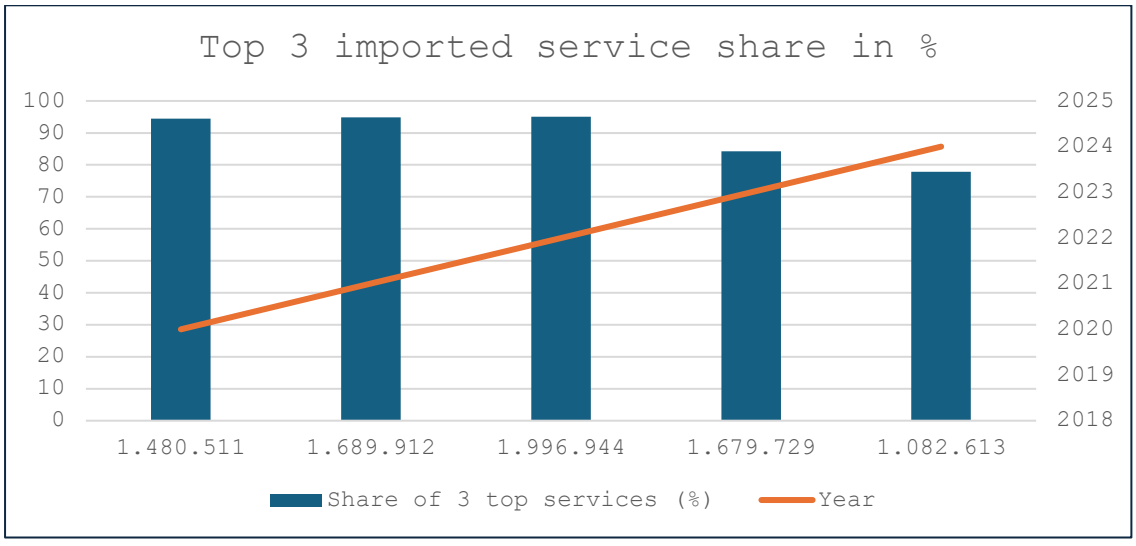

Table 58: Palestine's service import categories, 2020-2024, USD in thousands

Code	Service label	Imported Value in 2020	Imported Value in 2021	Imported Value in 2022	Imported Value in 2023	Imported Value in 2024
S	All services	1,567,242	1,781,608	2,100,017	1,993,184	1,390,510
3	Transport	227,033	301,353	355,444	619,978	515,558
4	Travel	1,140,536	1,239,978	1,461,359	695,174	285,504
10	Other business services	112,942	148,581	180,141	364,577	281,551

2	Maintenance and repair services i.e.	522	525	525		5
6	Insurance and pension services	35,716		50,110		

Source: ITC database

The share of the top imported three services in the entire service imports of Palestine during the past five years were between 77% and 95% as shown below.

Figure 35: Share of the top 3 imported services,2020-2024, USD in thousands

Source: ITC database

Chapter 13. IMPACT FACTORS

The following factors are listed as major impact factors and characteristics of international merchandise and service trade statistics of 2024.

13.1 General factors

- Geopolitical tensions (e.g., U.S.–China, EU–Russia) led to sanctions, rerouting, and export controls.
- Environmental regulations: Carbon border taxes (like EU CBAM), green standards affecting goods trade
- Environmental disruptions (e.g. climate events, droughts)
- Disruptions of key canals, routes, main maritime routes (e.g. due to conflicts, geopolitical instability) raised shipping times and costs, affecting transport and trade logistics
- Logistics bottlenecks (shipping capacity, congestion, route disruptions, delays) remain a major concern.
- Rising costs in freight, fuel, and transportation (in particularly at maritime, land modes).
- Large disparities between regions and developed and LCD countries. Some economies slower, others more resilient.
- Inflationary pressures and monetary tightening: higher interest rates in many countries, affecting costs, investment, consumption.
- Volatility in exchange rates (e.g., strong USD) which impacts competitiveness of exports and cost of imports for many countries.
- Increasing regulatory, investor, and consumer pressure for environmental, social and governance (ESG) compliance in supply chains and business practices.
- Shortages in skilled labor in certain sectors (transport, logistics, tech).
- Volatile prices for energy, raw materials, food commodities, driven by geopolitical risk, supply constraints, and demand fluctuations.
- Energy (fuel, power) costs feed into all parts of trade: transport, and manufacturing, which in turn affect price competitiveness.
- Increasing number of non-tariff barriers (NTBs), regulatory compliance, export controls.
- Customs, rules of origin, trade facilitation measures important in determining actual trade costs
- Many developing countries are facing high debt burdens, which limit their ability to invest in trade-infrastructure or absorb shocks.
- Political uncertainty in some countries affected trade policy.
- Uncertainty in investment (FDI) due to shifting trade policies or geopolitical risk
- Use of tech for supply chain visibility, risk management, automation, data analytics, AI to optimize trade operations.
- A sharp drop in international project finance raises concerns about sustainable development funding and highlights the need for countries to diversify strategies to attract and sustain investment.
- Foreign direct investment (FDI) to developing countries fell 2% in 2024, marking a second consecutive annual decline. The drop in international project finance was particularly sharp, plummeting 31%. Africa and Asia were hit hard, with nearly 200 fewer announced projects in Africa and almost 150 fewer in Asia.[23]

[23] https://unctad.org/news/foreign-investment-developing-economies-fell-2-2024-marking-second-year-decline

13.2 World Merchandise trade related factors

- Commodity price volatility affected trade in energy, metals, grains.
- Freight and logistics disruption: Shipping costs were volatile due to Red Sea and Panama Canal issues
- Regional or bilateral tariffs, export controls, and sanctions influenced trade flows, especially between major players like the U.S., China, Russian Federation, EU, etc.
- Trade restrictive and inward-looking industrial policies increased in many countries, affecting export-import rules, subsidies, and competitive dynamics.
- Trade in critical minerals linked to energy transition (e.g. batteries, renewables) becomes more strategic; securing supply of such inputs influences trade and investment.
- Oil prices and energy geopolitics dominate export trends in certain regions such as gulf countries

13.3 World Service trade related factors

- Digitalization & tech adoption: Explosive growth in digitally deliverable services (IT, cloud, finance, creative work).
- Travel and transport services rebound: Strong demand for business travel and logistics, though challenged by high costs.
- Labor & skills shortages: Especially in transport (e.g., pilots, logistics workers) and IT.
- Data regulations & cross-border restrictions: Increasingly influential in digital service trade (e.g., data sovereignty laws).
- Global talent mobility: Immigration rules, visas, and remote work models all shaped service trade potential.
- Growth of digitally delivered services (e-commerce, IT services, digital finance, cloud, software etc.) boosting service trade.

13.4 Impact factors of OIC merchandise trade in 2024

Commodity Price Volatility

- **Oil & Gas:** OIC Member Countries that are major oil producers (e.g., Saudi Arabia, UAE, Kuwait, Iran, and Iraq) are impacted by fluctuations in oil prices. The ongoing energy transition and geopolitical risks (like tensions in the Middle East) play a significant role in the pricing of petroleum products, which directly affects exports.
- **Metals & Agriculture:** For countries like Indonesia, Türkiye, Malaysia, and Pakistan, fluctuations in the prices of commodities like copper, palm oil, textiles, and rice impact export revenues. Commodity price swings (both up and down) influence OIC's trade balance.

Geopolitical Instability

- Conflicts in Syria, Yemen, and tensions around the Persian Gulf, particularly around the Strait of Hormuz, have affected shipping routes and added volatility to oil prices. This instability affects the trade flows of member countries in the region.
- Countries like Iran, Iraq, Yemen, Sudan and Syria continue to face international sanctions, which limit their ability to engage fully in global trade. U.S. sanctions on Iran, for instance, impact its trade in both goods (oil) and services.

Infrastructure Development & Connectivity

- OIC Member Countries are investing in logistical hubs (e.g., Türkiye's position as a trade gateway between Europe and Asia, UAE's Dubai ports, Malaysia's shipping corridors) to capitalize on their geographic location for merchandise exports.
- The Africa–Middle East–Asia trade corridor is expanding, with investments in roads, ports, and rail systems, improving connectivity for goods trade, especially between African and Asian OIC members.

Regional Trade Agreements (RTA) & Intra-OIC Trade

- The OIC is making efforts to boost intra-member trade through initiatives like the OIC Trade Preferential System (TPS-OIC), although intra-OIC trade still represents a small share of global trade. By 2024, progress in implementation of AfCFTA (African Continental Free Trade Area) and CFTA (Common Market for Eastern and Southern Africa) in parts of Africa is expected to open new markets for OIC Member Countries.
- Among the OIC Member Countries, Türkiye's role as an intermediary between Europe and the Middle East/Asia continues to be crucial, especially with its agreements with regional partners.

Manufacturing Growth and Diversification

- Continues like Türkiye and Indonesia continue to emerge as manufacturing hubs, especially for electronics, automotive, and textiles. However, value-added manufacturing remains a challenge for many OIC Member Countries in Sub-Saharan Africa and South Asia.
- Diversification efforts are crucial for countries like Saudi Arabia and Qatar, who are focused on Vision 2030 initiatives to reduce dependency on oil exports and grow other sectors like chemicals, metals, and manufacturing.

Climate Change and Sustainability Pressures

- Trade policies related to green products (e.g., electric vehicles, renewable energy) are creating new opportunities for some OIC Member Countries, such as Malaysia and Indonesia. However, environmental challenges—such as droughts, floods, and desertification—can also disrupt agriculture and infrastructure in many member countries.
- Environmental regulations (e.g., EU's CBAM—Carbon Border Adjustment Mechanism) could also impact OIC Member Countries' exports of carbon-intensive products like steel, cement, and chemicals.

13.5 Impact factors on OIC services trade in 2024

Digital Services and Remote Work

- Countries with robust digital infrastructures (e.g., UAE, Saudi Arabia, Türkiye, Malaysia) have capitalized on the growth of remote work and digitally delivered services, such as IT services, consulting, finance, and telemedicine.
- Countries like Pakistan, Bangladesh, and Egypt are emerging as outsourcing hubs for global services in IT, software development, customer support, and other business process outsourcing activities.
- The expansion of digital trade agreements (e.g., the Digital Economy Partnership Agreement (DEPA)) involving countries like Singapore, Chile, and New Zealand may open new opportunities for OIC members, particularly in digital services.

Tourism and Hospitality

- Tourism recovery in the OIC region has been strong post-pandemic, especially in Saudi Arabia (with its Vision 2030 tourism push), UAE, Malaysia, and Türkiye.
- The Hajj and Umrah pilgrimage drives services trade, especially for countries like Saudi Arabia, Pakistan, and Indonesia, where travel, accommodation, and logistics play key roles.
- The broader Middle East and North Africa (MENA) region benefits from growing luxury tourism, especially in countries like Egypt, UAE and Qatar.

Financial Services and Islamic Finance

- The growth of Islamic finance continues to be a strong driver of services trade. Countries like Malaysia, Saudi Arabia, and UAE are global leaders in Sharia-compliant finance services, including banking, insurance, and investment.
- The establishment of Dubai International Financial Centre (DIFC) and Qatar Financial Centre strengthens the region's role as a hub for Islamic finance and financial technology (fintech).

Education and Knowledge Transfer

- Higher education services in countries like Malaysia, Türkiye, and UAE continue to grow as study destinations for students, particularly from other OIC Member Countries and Sub-Saharan Africa.
- Distance learning and MOOCs (Massive Open Online Courses) are increasingly offered by universities in Egypt, Türkiye, Saudi Arabia, and others, enhancing services exports in education.

Health Services and Medical Tourism

- The medical tourism sector, particularly in countries like the UAE, Türkiye, and Jordan, is expected to grow. These countries have made significant investments in healthcare infrastructure, attracting patients from both OIC and non-OIC Member Countries for specialized medical treatments, surgeries, and wellness retreats.
- Telemedicine services and digital health solutions are also a rising sector within the OIC Member Countries, particularly for countries with growing tech hubs like Türkiye and UAE.

Regulatory & Trade Barriers

- For services, the digital trade barriers (such as data protection laws, cross-border data flow regulations) continue to be significant. Countries like Türkiye, Saudi Arabia, and Malaysia are advancing in e-commerce and data protection regulations, which may impact digital services exports.
- Trade restrictions on financial services (due to sanctions) impact countries like Iran and Syria, limiting their ability to offer competitive services in the global market.

Annex 1. TRADE STATISTICS SOURCES

The following international and national databases are mostly utilized in drafting of this outlook and the statistics and other trade related information are retrieved on 1-20 September 2025.

1.World merchandise trade
